QUESTION 1

Your company has a main office and two branch offices named Branch1 and Branch2. The main office contains a file server named Server1 that has BranchCache enabled. Branch1 contains a

server named Server2 that is configured as a hosted cache server.

All client computers run Windows 8 Enterprise. All of the computers are joined to an Active Directory domain.

The BranchCache settings of all the computers are configured as shown in the following exhibit.

(Click the Exhibit button.)

BranchCache GPO
Data collected on: 5/17/2013 7:30:30 AM

Computer Configuration (Enabled) [hide](#)

Policies [hide](#)

Administrative Templates [hide](#)

Policy definitions (ADMX files) retrieved from the local computer.

Network/BranchCache [hide](#)

Policy	Setting	Comment
Configure BranchCache for network files	Enabled	
Type the maximum round trip network latency (milliseconds) after which caching begins		
	80	
Enable Automatic Hosted Cache	Enabled	
Discovery by Service Connection Point	Enabled	
Set BranchCache Distributed Cache mode	Enabled	
Set percentage of disk space used for client computer cache	Enabled	
Specify the percentage of total disk space allocated for the cache		
	5	
Turn on BranchCache	Enabled	

User Configuration (Enabled) [hide](#)

No settings defined.

In the table below, identify the effective setting for the client computers in each branch office. Make one selection in

each column. Each correct selection is worth one point.

Hot Area:

Effective setting	Branch1 Computers	Branch2 Computers
Will not use BranchCache.	<input type="checkbox"/>	<input type="checkbox"/>
Will retrieve cached content from peers.	<input type="checkbox"/>	<input type="checkbox"/>
Will retrieve cached content from Server1.	<input type="checkbox"/>	<input type="checkbox"/>
Will retrieve cached content from Server2.	<input type="checkbox"/>	<input type="checkbox"/>

Correct Answer:

Effective setting	Branch1 Computers	Branch2 Computers
Will not use BranchCache.	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Will retrieve cached content from peers.	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Will retrieve cached content from Server1.	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Will retrieve cached content from Server2.	<input checked="" type="checkbox"/>	<input type="checkbox"/>

QUESTION 2

Your company has several Windows RT 8.1 devices. The devices connect to Exchange Online in Microsoft Office 365 and to Windows Intune for device management.

Setting name	Local device setting	Windows Intune setting	Exchange Online setting
Require a password to unlock mobile devices	Not configured	Yes	No
Required password type	Not configured	Alphanumeric	Numeric
Minimum password length	Not configured	10	12
Allow simple passwords	Not configured	No	Yes
Minutes of inactivity before device screen is locked	Not configured	10	5

The security policies of Office 365 and Windows Intune are configured as shown in the following table.

You need to identify the effective settings on the Windows RT devices.

What should you identify? (To answer, select the appropriate effective configuration for each setting in the answer area.)

Answer Area

Require a password to unlock mobile devices:

Required password type:

Minimum password length:

Allow simple passwords:

Minutes of inactivity before device screen is locked:

QUESTION 3

You support laptops that run Windows 8 Pro and are part of a workgroup.

An employee is unable to start Windows Mobility Center on his laptop. You need to make it possible for the employee to use Windows Mobility Center on the laptop.

What should you do?

- A. Use Add features to Windows 8 to add Windows Mobility Center.
- B. Use Programs and Features to repair the installation of Windows Mobility Center.
- C. Use Local Group Policy Editor to set Turn off Windows Mobility Center to Not Configured.
- D. Use Turn Windows features on or off in Programs and Features to enable Windows Mobility Center.

Correct Answer: C

How to Enable or Disable Windows Mobility Center in Windows 7 and Windows 8

Reference:

<http://www.sevenforums.com/tutorials/88151-windows-mobility-center-enable-disable.html> Original answer \\A\\ however, I reviewed in lab and could not find Windows Mobility Center within Windows Features options.

User Configuration > Administrative Templates > Windows Components and Windows Mobility Center

QUESTION 4

You administer laptops that run Windows 8 Enterprise and are members of an Active Directory domain.

Users travel frequently and access domain resources from inside client networks or from their home network. You want to manage the laptops when they are connected to the company network from the external networks.

You need to ensure that the laptops can be managed and maintained while users are not logged on to the computers.

Which of the following should you recommend?

- A. Remote Assistance
- B. Windows Remote Management (WinRM)
- C. DirectAccess
- D. Remote Desktop

Correct Answer: C

Explanation: Networking and Access Technologies

Reference: <http://technet.microsoft.com/en-us/network/dd420463.aspx>

DirectAccess, introduced in the Windows 7 and Windows Server 2008 R2 operating systems, allows remote users to securely access enterprise shares, web sites, and applications without connecting to a virtual private network (VPN). DirectAccess establishes bi-directional connectivity with a user's enterprise network every time a user's DirectAccess-enabled portable computer connects to the Internet, even before the user logs on. Users never have to think about connecting to the enterprise network and IT administrators can manage remote computers outside the office, even when the computers are not connected to the VPN. Forefront Unified Access Gateway (UAG) 2010 extends the benefits of DirectAccess across your infrastructure, enhancing scalability and simplifying deployment and ongoing management.

QUESTION 5

At home, you use a Windows 8.1 desktop computer. At work, you use a Windows 8.1 laptop that is connected to a corporate network. You use the same Microsoft account to log on to both computers.

You have a folder with some personal documents on your desktop computer. The folder must be available and synced between both computers.

You need to ensure that the latest version of these files is available.

What should you do?

- A. Create a folder by using SkyDrive for Windows. Move all of the personal documents to the new folder.

- B. Move the folder to the Libraries folder. Go to PC Settings. Under Sync your settings, enable App settings.
- C. Right-click the folder and click Properties. Under Security, provide Full Control for the Microsoft account.
- D. Right-click the folder and select Share With, and then select Homegroup (view and edit).

Correct Answer: A
