QUESTION 1

You need to recommend a solution to provide remote connectivity for the development department users. The solution must meet the Intune requirements. What should you include in the recommendation?

A. Set Intune as the mobile device management authority.

B. Create a script to add the users to the Remote PC Connect group on the desktop computers.

C. From the Configuration Manager Console, modify the primary device property of the users.

D. From the Configuration Manager Console, deploy the Intune connector site system role.

Correct Answer: D

QUESTION 2

Your company purchases an application named App1. App1 is installed by using a Windows Installer (MSI) package. App1 will be uninstalled and updated frequently.

You need to deploy App1 by using Microsoft System Center 2012 R2 Configuration Manager.

What is the best type of object to use? More than one answer choice may achieve the goal. Select the BEST answer.

A. an application

B. an automatic deployment rule

C. a package

D. a configuration item

Correct Answer: B

QUESTION 3

You have a deployment of Microsoft System Center 2012 R2 Configuration Manager. All site system roles are deployed. All client computers have the Configuration Manager client installed.

An application named App1 is deployed to all of the client computers. Your organization licenses App1 annually from the application vendor. The licenses are based on the number of App1 installations that exist in the organization at the end

of the fiscal year.

You need to identify on which computers App1 is not being used.

What should you create first?

A. a configuration baseline

B. a software metering rule

C. a software category

D. an automatic deployment rule

Correct Answer: B

QUESTION 4

You have a deployment of Microsoft a System Center 2012 R2 Configuration Manager. All client computers have the Configuration Manager client installed.

You need to ensure that only the client computers in a branch office have Configuration Manager Endpoint Protection settings configured to scan all of the email messages on the computers.

What should you configure first?

A. the scan settings of a new antimalware policy

B. the real-time protection settings of a new antimalware policy

C. the exclusion settings of the Default Antimalware Policy

D. the default actions of the Default Antimalware Policy

Correct Answer: A

QUESTION 5

You need to generate the security report. What should you do first?

A. From Windows Intune, configure an alert policy.

B. From Configuration Manager, deploy a configuration baseline.

C. From Group Policy Management, run the Group Policy Results Wizard.

D. From Update Services, configure reporting rollup.

Correct Answer: B
