**QUESTION 1**

All computers are connected to Homegroup. User wants to share a printer.

The printer function for the computer it is attached to.

You verify that printers are enabled under homegroup settings, but the printer does not appear on the network.

The user is able to share documents and access other shared printers in the Homegroup.

You need to allow other users to use the printer.

What should you do?

- A. Enable sharing under the printer properties
- B. Map the printer on the client computers
- C. Update the printer driver to a version that supports homegroup sharing
- D. Disable and reenabte the sharing of printers under homegroup on the computer

Correct Answer: A

**QUESTION 2**

You support Windows 10 Enterprise client computers. Company policy requires that Microsoft Outlook 2010 be the only mail client allowed and supported.

You collect software metering data and discover that several users are running other thirdparty mail clients.

You need to block the third-party mail client from running on the computers. All other applications should be allowed.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

### Actions

- Open **Computer Configuration of Group Policy**.
- Select **Software Restriction Policies** and set the default to **Disallowed**.
- Create new AppLocker Deny Script rules.
- Open **User Configuration of Group Policy**.
- Enable enforcement of executable rules.
- Create new AppLocker Deny Executable rules
- Enable Audit enforcement of Script rules.

### Answer Area

www.Pass4Lead.com

Correct Answer:

### Actions

- Select **Software Restriction Policies** and set the default to **Disallowed**.
- Create new AppLocker Deny Script rules.
- Open **User Configuration of Group Policy**.
- Enable Audit enforcement of Script rules.

### Answer Area

Open **Computer Configuration of Group Policy**.

Create new AppLocker Deny Executable rules.

Enable enforcement of executable rules.

### QUESTION 3

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are the system administrator for a sales company. You manage the Microsoft Office 365 environment for your company. You are investigating the requirements for Office 365 data loss prevention (DLP). All users have an Enterprise E5

license.

You must ensure that all users are prevented from storing social security numbers in Office 365.

You need to implement a DLP policy that meets the requirement.

Solution: Create a DLP policy with Microsoft OneDrive for Business sites as a content source location.

Does the solution meet the goal?

A. Yes

B. No

Correct Answer: B

#### QUESTION 5

You administer computers that run Windows 10 Enterprise and are members of an Active Directory domain. Some volumes on the computers are encrypted with BitLocker.

The BitLocker recovery passwords are stored in Active Directory. A user forgets the BitLocker password to local drive E: and is unable to access the protected volume.

You need to provide a BitLocker recovery key to unlock the protected volume.

Which two actions should you perform? (Each correct answer presents part of the solution. Choose two.)

- A. Ask the user to run the `manage-bde-protectors-disable e:` command.
- B. Ask the user for his or her logon name.
- C. Ask the user to run the `manage-bde-unlock E:-pw` command.
- D. Ask the user for his or her computer name.
- E. Ask the user for a recovery key ID for the protected drive.

Correct Answer: CD

D: To view the recovery passwords for a computer you would need the computer name:

In Active Directory Users and Computers, locate and then click the container in which the computer is located.

Right-click the computer object, and then click Properties.

In the Properties dialog box, click the BitLocker Recovery tab to view the BitLocker recovery passwords that are associated with the particular computer.

C: The Manage?de: unlock command unlocks a BitLocker-protected drive by using a recovery password or a recovery key.
