QUESTION 1

You are building a guarded fabric. You need to configure Admin-trusted attestation. Which cmdlet should you use?

- A. Add-HgsAttestationHostGroup
- B. Add-HgsAttestationTpmHost
- C. Add-HgsAttestationCIPolicy
- D. Add-HgsAttestationTpmPolicy

Correct Answer: A

Authorize Hyper-V hosts using Admin-trusted attestation <https://docs.microsoft.com/en-us/windows-server/virtualization/guarded-fabric-shielded-vm/guarded-fabric-addhost-information-for-admin-trusted-attestation>

QUESTION 2

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain named contoso.com. All client computers run Windows 10.

You plan to deploy a Remote Desktop connection solution for the client computers.

You have four available servers in the domain that can be configured as Remote Desktop servers. The servers are configured as shown in the following table.

Server name	Operating system	Location
Server1	Windows Server 2012 R2	on-premises
Server2	Windows Server 2016	Microsoft Azure
Server3	Windows Server 2016	on-premises
Server4	Windows Server 2012 R2	Microsoft Azure

You need to ensure that all Remote Desktop connections can be protected by using Remote Credential Guard.

Solution: You deploy the Remote Desktop connection solution by using Server1. Does that meet the goal?

- A. Yes
- B. No

Correct Answer: B

<https://docs.microsoft.com/en-us/windows/security/identity-protection/remote-credential-guard>

QUESTION 3

You plan to use the Security and Audit solution in Microsoft Operations Management Suite (OMS) to monitor servers that run Windows Server 2016. The servers are prevented from accessing the Internet.

You create an OMS workspace and add the Security and Audit solution.

You need to ensure that you can monitor the servers.

What should you do first?

- A. From Connected Sources, click Download OMS Gateway.
- B. From Accounts, modify the Azure Subscription and Data Plan setting.
- C. From Accounts, add an Automation Account.
- D. From Connected Sources, click Download Windows Agent (32 bit).

Correct Answer: B

QUESTION 4

Your network contains an Active Directory forest named contoso.com. The forest functional level is Windows Server 2012.

The forest contains 20 member servers that are configured as file servers. All domain controllers run Windows Server 2016.

You create a new forest named contosoadmin.com.

You need to use the Enhanced Security Administrative Environment (ESAE) approach for the administration of the resources in contoso.com.

Which two actions should you perform? Each correct answer presents part of the solution.

- A. From the properties of the trust, enable selective authentication.
- B. Configure contosoadmin.com to trust contoso.com.
- C. Configure contoso.com to trust contosoadmin.com.
- D. From the properties of the trust, enable forest-wide authentication.
- E. Configure a two-way trust between both forests.

Correct Answer: AC

https://docs.microsoft.com/en-us/windows-server/identity/securing-privileged-access/securing-privilegedaccess-reference-material#ESAE_BM Trust configurations ?Configure trust from managed forests(s) or domain(s) to the administrative forestA one-way trust is required from production environment to the admin forest. This can be a domain trust or a forest trust.The admin forest/domain (contosoadmin.com) does not need to trust the managed domains/forests (contoso.com) to manage Active Directory, though additional applications may require a two-way trust relationship, security validation, and testing.Selective authentication should be used to restrict accounts in the admin forest to only logging on to the appropriate production hosts.

QUESTION 5

Your network contains an Active Directory domain named contoso.com. The domain contains two servers named Server1 and Server2 that run Windows Server 2016.

The Microsoft Advanced Threat Analytics (ATA) Center service is installed on Server1.

The domain contains the users shown in the following table.

Name	Group membership
User1	Contoso\Server Operators
User2	Contoso\Key Admins
User3	Server1\Administrators
User4	Server1\Network Configuration Operators
User5	Server1\Power Users
User6	Server1\Microsoft Advanced Threat Analytics Administrators
User7	Server1\Microsoft Advanced Threat Analytics Users
User8	Server1\Microsoft Advanced Threat Analytics Viewers

You are installing ATA Gateway on Server2.

You need to specify a Gateway Registration account. Which account should you use?

- A. User1
- B. User2
- C. User3
- D. User4
- E. User5
- F. User6
- G. User7
- H. User8

Correct Answer: F

<https://docs.microsoft.com/en-us/advanced-threat-analytics/ata-role-groups>

Activity	Microsoft Advanced Threat Analytics Administrators	Microsoft Advanced Threat Analytics Users	Microsoft Advanced Threat Analytics Viewers
Login	Available	Available	Available
Provide Input for Suspicious Activities	Available	Available	Not available
Change status of Suspicious Activities	Available	Available	Not available
Share/Export suspicious activity via email/get link	Available	Available	Not available
Change status of Monitoring Alerts	Available	Available	Not available
Update ATA Configuration	Available	Not available	Not available
Gateway – Add	Available	Not available	Not available
Gateway – Delete	Available	Not available	Not available
Monitored DC – Add	Available	Not available	Not available

The user who installed ATA will be able to access the management portal (ATA Center) as members of the "Microsoft Advanced Threat Analytics Administrators"local group on the ATA Center server.
