

700-905^{Q&As}

Cisco HyperFlex for Systems Engineers

Pass Cisco 700-905 Exam with 100% Guarantee

Free Download Real Questions & Answers **PDF** and **VCE** file from:

<https://www.pass2lead.com/700-905.html>

100% Passing Guarantee
100% Money Back Assurance

Following Questions and Answers are all new published by Cisco
Official Exam Center

- ⚙️ **Instant Download** After Purchase
- ⚙️ **100% Money Back** Guarantee
- ⚙️ **365 Days** Free Update
- ⚙️ **800,000+** Satisfied Customers

QUESTION 1

Drag the server type from the left onto the maximum number of capacity drives on the right.

Select and Place:

HX220c-M5SX	6-12
HX240c-M5SX	6-8
HX240c-M5L	6-23

Correct Answer:

	HX240c-M5L	6-12
	HX220c-M5SX	6-8
	HX240c-M5SX	6-23

QUESTION 2

When local writing or reading is performed, the IOVisor intercepts the read/write requests and forwards them to CVMs across the cluster. This action allows non-local CVMs to be aware of the input/output requests so that they can perform the appropriate input/output action. IOVisor provides which two additional functionalities? (Choose two.)

- A. provides redundancy when local CVM fails, offloading data processing to another CVM in the cluster
- B. when an IOVisor fails, the CVM remains active and functional, which enables uninterrupted operation of the system by forwarding IO to another available IOVisor in the HyperFlex cluster
- C. enables asynchronous replication of data across individual HyperFlex nodes with sub-second re-convergence
- D. integration point for deployment of cloud-based SaaS offerings from eco-system partners
- E. intercepts local virtual machines' reads and writes and distributes them across the network eliminating hotspots

Correct Answer: AE

QUESTION 3

How many memory channels does the Cisco UCS M5 server support per CPU?

- A. 1
- B. 2
- C. 6
- D. 8

Correct Answer: C

QUESTION 4

Which two results are expected when you replace a node or expand a cluster? (Choose two.)

- A. Distributed pooled data is migrated off nodes to master data store.
- B. Affected node is marked as unhealthy and placed into standby mode
- C. vSphere DRS migrates the virtual machines to the new node to balance the load
- D. On node replace, the self-healing must finish for the cluster to be healthy
- E. The cluster profile is updated and RAID takes care of rebalancing the load.

Correct Answer: CD

QUESTION 5

Which two processes does Disk Failure initiate? (Choose two)

- A. The affected cluster is marked as unhealthy and placed into standby mode
- B. If the replication factor is sufficient for the failure, the system is marked as unhealthy but remains operational
- C. Distributed pooled data is migrated off nodes to master data store.
- D. Performance is almost unaffected Sets 1-minute timer until self-healing starts.
- E. Self-healing mode is initiated and data replication factors applied.

Correct Answer: BD
