A customer requires that two of its employees be able to place toll calls to Australia, while all other employees are restricted to local dialing only. The customer's Communication Server 1000 is programmed with all required NCOS, FRL and Route List Index (RLI). What is the most restrictive NCOS to assign to the two employees required to make toll call Australia given the tables, assuming that the call must complete over RLI 2 and the user must be able to use any RLI 2 entry to reach Australia?

- A. NCOS 1
- B. NCOS 2
- C. NCOS 3

D. NCOS 4

E. NCOS 5

Correct Answer: E

QUESTION 5

Which functionality do TIE trunks provide?

A. connects a telephone company's central office and the PBX of a customer

B. connects two different PBXs, whether in the same building or farther away

C. allows an outside caller to dial a station on a PBX directory

D. provide incoming or outgoing service only, and not a combination of incoming/outgoing connections

Correct Answer: B
