QUESTION 1

Your company is introducing a new line of computers.

All of the computers use Unified Extensible Firmware Interface (UEFI).

You need to create a partition that includes the Windows Recovery Environment (Windows RE).

Which two actions should you perform? (Each correct answer presents part of the solution. Choose two.)

- A. Set the partition Type to Primary.
- B. Set the partition Type to EFI.
- C. Set the partition TypeID to 0x27.
- D. Set the partition TypeID to de94bba4-06d1-4d40-a16a-bfd50179d6ac
- E. Set the partition Type to MSR.
- F. Set the partition TypeID to 0x07.

Correct Answer: AD

QUESTION 2

Your company plans to implement a deployment solution for 500 new client computers. The company identifies the following requirements for the planned implementation:

A technician must be able to deploy operating systems to computers that use the ARM architecture.

The solution must NOT require the implementation of an Active Directory forest.

A technician must be able to schedule the deployment of operating systems.

You need to recommend a solution that meets the requirements.

Which two technologies should you include in the recommendation? (Each correct answer presents part of the solution. Choose two.)

- A. Windows Server 2012 Standard
- B. Windows Deployment Services (WDS)
- C. The Microsoft Deployment Toolkit (MDT)
- D. Windows Server 2008 R2 Enterprise
- E. Microsoft System Center 2012
- F. Windows Server 2008 R2 Standard

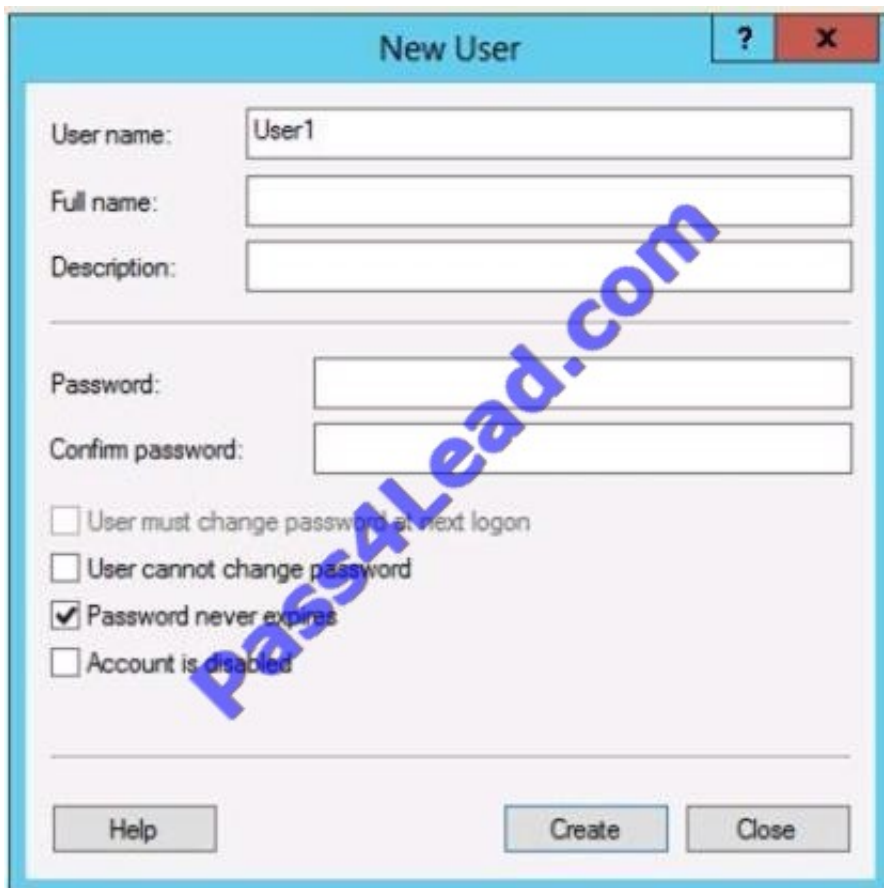

Correct Answer: AB

QUESTION 3

You have a server named Server1. Server1 is the member of a workgroup.

On Server1, you create a local user account named User1, as shown in the following exhibit. (Click the Exhibit button.)

On Server1, you create a share named Share1. You assign User1 Full control permissions to Share1. You copy the source files for Windows 8 to Share1.

When attempting to access Share1 from Windows Preinstallation Environment (Windows PE), User1 receives an error message.

You need to ensure that User1 can access Share1 from Windows PE.

What should you do?

- A. From Server1, modify the Advanced Sharing properties.
- B. Clear the Password never expires check box for the user account of User1.
- C. Add a password to the user account of User1.

D. From Server1, modify the Advanced settings in System Properties.

Correct Answer: C

QUESTION 4

You have a technician computer that has the Windows Assessment and Deployment Kit (Windows ADK) installed.

You have a Windows Preinstallation Environment (Windows PE) build environment that contains the Boot.wim image.

You need to add Imagex.exe to Windows PE. You mount Boot.wim.

What should you do next?

A. From Windows System Image Manager, add the path to Imagex.exe to the section of the Unattend.xml file.

B. From Windows Explorer, copy Imagex.exe.

C. Add Imagex.exe to the third line of the Startnet.cmd file.

D. Run `dism.exe /add-package`.

Correct Answer: B

QUESTION 5

A customer plans to deploy Windows Server 2012 Standard to several servers.

The customer identifies the following hardware requirements for the planned deployment:

Must support three volumes in a single mirror without the installation of third-party management software.

Must support NIC teaming without the installation of third-party management software.

Must be able to back up the server data to a tape device.

Must be able to run on an x86 hardware platform.

You need to identify which two requirements are met by the planned deployment of Windows Server 2012.

Which two requirements should you identify? (Each correct answer presents part of the solution. Choose two.)

A.

Must support three-way mirrors without the installation of third-party management software.

B.

Must support NIC teaming without the installation of third-party management software.

C.

Must be able to run on an x86 hardware platform.

D.

Must be able to back up the server data to a tape device.

Correct Answer: AB
