QUESTION 1

You have three images sealed in Out-of-Box-Experience (OOBE) mode.

You use the images on a daily basis to build client computers for customers.

A new customer places an order for 500 computers. The customer\'s requirements for the comput- ers are not met by any of the images.

You identify an image that you can modify by installing two applications required by the cu- tomer.

You plan to customize the image before you deploy the image to the computers.

You need to identify which steps must be taken to modify the image.

What should you do before you capture the image?

A. Start the image in audit mode on a reference computer. Install the required applications. Seal the image in audit mode.

B. Start the image in audit mode on a reference computer. Install the required applications. Seal the image in OOBE mode.

C. Start the image in audit mode on a reference computer. Install the required applications. Restart the computer.

D. Start the image on a reference computer. Install the required applications. Seal the image in audit mode.

Correct Answer: B

QUESTION 2

You plan to deploy an image to several client computers that have identical hardware installed.

You need to prevent the Plug and Play device drivers from being uninstalled and then reinstalled when the image is deployed.

Which configuration pass in the answer file should you modify?

A. auditSystem

B. oobeSystem

C. specialize

D. generalize

Correct Answer: D

QUESTION 3

You plan to deploy operating systems to several servers. The servers have RAID controllers.

You plan to install three hard disks on each server.

You need to configure the servers to meet the following requirements:

Ensure that all data will be available if a single disk fails.

Provide the highest amount of disk space to store files. Which RAID level should you configure on the servers?

A.

RAID 0

B.

RAID 1

C.

RAID 5

D.

RAID 6

Correct Answer: C

QUESTION 4

You are preparing the hard disk drive for a Unified Extensible Firmware Interface (UEFI)-based computer.

You start the computer from a Windows Preinstallation Environment (Windows PE) environ- ment.

You need to ensure that you can start Windows from the hard disk drive.

Which command should you use?

A. Bcdedit

B. Bcdboot

C. Diskpart

D. Bootsect

Correct Answer: B

QUESTION 5

You have an offline image of Windows 8 Pro. The image contains a driver for a third-party hard- ware device.

An updated driver for the device is released.

You need to add the driver to the image. The solution must minimize administrative effort.

Which three actions should you perform in sequence? (To answer, move the appropriate three actions from the list of actions to the answer area and arrange them in the correct order.)

Select and Place:

Actions	Answer Area
Add the driver to Windows System Image Manager (Windows SIM).	
Capture the image	
Copy the INF files for the driver to the Windows\Inf folder.	
Unmount the image.	
Mount the image.	
Deploy the image.	
Inject the driver.	

Correct Answer:

Actions	Answer Area
Add the driver to Windows System Image Manager (Windows SIM).	Mount the image.
Capture the image	Inject the driver.
Copy the INF files for the driver to the Windows\Inf folder.	Unmount the image.
Deploy the image.
