-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

**QUESTION 1**

What port does Internet Printing use?

- A. 80
- B. 9100
- C. 443
- D. 1801

Correct Answer: A

When you print using Internet Printing, you are printing using HTTP commands. Therefore, you are using port 80.

---

**QUESTION 2**

Permissions assigned to an NTFS file are stored in a: A. certificate

- B. template
- C. ACL
- D. group

Correct Answer: C

When files and folders are created on an NTFS volume, a security descriptor known as an Access Control List (ACL) is created.

---

**QUESTION 3**

You plan to repurpose an existing computer to run a clean installation of Windows Server 2016 Standard edition. Which type of hard drive interface should you use for the boot drive?

- A. PATA
- B. ATA
- C. SATA
- D. IDE

Correct Answer: C

---

**QUESTION 4**

What device contains many hard drives and is used by multiple servers as a central storage area?

- A. NAS
- B. SAN
- C. VOL
- D. Dynamic Drive

Correct Answer: B

A storage area network (SAN) is an architecture used for disk arrays, tape libraries, and optical jukeboxes to appear as locally attached drives on a server. A SAN always uses some form of RAID and other technology to make the system redundant against drive failure and to offer high performance.

---

#### QUESTION 5

You work as a Server Administrator for company Inc. The company has an Active Directory Domain Services (ADDS) domain. All servers of the company run Windows Server 2016 and all client computers run Windows 10.

You want to facilitate authorized remote users to connect to resources on an internal network from any Internet-connected device that is used to run the Remote Desktop Connection (RDC) client.

Which of the following will you deploy to accomplish the task?

- A. RD Connection Broker
- B. RD Licensing
- C. RD Web Access
- D. RD Gateway

Correct Answer: D

In order to accomplish the task, you should deploy RD Gateway. Remote Desktop Gateway (RD Gateway), previously known as Terminal Services Gateway (TS Gateway), is a role service in the Remote Desktop Services server role which is included with Windows Server 2016 Operating System. It is used to facilitate authorized remote users to connect to resources on an internal or private network, from any Internet-connected device that is used to run the Remote Desktop Connection (RDC) client.

Incorrect Answers:

A: Remote Desktop Connection Broker (RD Connection Broker) is used to grant users access to RemoteApp and Desktop Connection. RemoteApp and Desktop Connection are used to grant users an aggregated view of RemoteApp programs, session-based desktops, and virtual desktops to users at specific levels. RD Connection Broker is also used to support load balancing and reconnection to Remote Desktop sessions, and RemoteApp programs that can also be accessed by using RemoteApp and Desktop Connection.

B: Remote Desktop Licensing (RD Licensing) is a role service in the Remote Desktop Services server role included within Windows Server 2016. RD Licensing is used to manage the Remote Desktop Services client access licenses (RDS CALs) that are required for particular device or client to connect to a Remote Desktop Session Host (RD Session Host) server. The client uses Remote Desktop Licensing Manager (RD Licensing Manager) to install and track the actual availability of RDS CALs on a Remote Desktop license server.

C: Remote Desktop Web Access (RD Web Access) is used to enable users to access RemoteApp and Desktop Connection via Start menu on a computer that is either running Windows 10 or through a Web browser. RemoteApp and Desktop Connection are used to provide a customized view of RemoteApp programs and virtual desktops to the users.
