QUESTION 1

What mode starts Windows with the last registry and driver configuration that worked successfully?

- A. Safe mode
- B. Last Known Good Configuration
- C. Directory Services Restore Mode
- D. Debugging Mode

Correct Answer: B

Last known good configuration starts Windows with the last registry and driver configuration that worked successfully, usually marked as the last successful logon.

QUESTION 2

To protect a server in case of a blackout, you should use a/an:

- A. Uninterruptible Power Supply.
- B. Dedicated surge protector.
- C. Power Supply Unit.
- D. Redundant power supply.
- E. Hot-swappable power supply.
- F. Line conditioner.

Correct Answer: A

QUESTION 3

You work as a System Administrator for company Inc. You have deployed a workstation and roll it out to production, but you find some issues with the video display.

The display worked in the beginning when you first set up the system. The video has degraded to standard VGA 640x800 and its performance is badly affected after applying several system and driver updates.

What is the most likely cause of this issue?

- A. The video adapter is not properly placed on the system board.
- B. The video card is not enabled on the system.
- C. You need to upgrade RAM according to the video driver.

D. You have installed an unsigned video driver.

Correct Answer: D

In the given scenario, the video problem occurred because of the installation of an unsigned video driver. For better performance, you should always use a device driver that is signed by Microsoft. Unsigned drivers are not compatible with all

systems. They may be poorly written and may include viruses or malware.

Incorrect Answers:

A, B: If the video adapter is not properly placed on the system board or the video card is not enabled, you do not get the video clip in the beginning when you first set up the system.

C: It is not required to upgrade RAM.

QUESTION 4

Which of the following image file formats can be deployed using Windows Server 2016? (Choose three.)

A. GHO

B. WIM

C. PXE

D. VHD

E. VHDX

Correct Answer: BDE

Windows Server 2016 WDS supports WIM, VHD and VHDX files.

QUESTION 5

What authorizes a user to perform a certain action on a computer?

A. user rights

B. permissions

C. assignments

D. certificates

Correct Answer: A

A right authorizes a user to perform certain actions on a computer, such as logging on to a system interactively or backing up files and directories on a system. User rights are assigned through local policies or Active Directory Group Policy.
