QUESTION 1

HOTSPOT

You have the following code segment. Line numbers are included for reference only.

```
01 public class Customer
02 {
03     private int id = 3;
04     public static void main(String[] args)
05     {
06         Customer customer = new Customer();
07         id = 5;
08         showId();
09     }
10
11     protected void showId()
12     {
13         System.out.println(id);
14     }
15 }
```

The code does not compile.

For each of the following statements, select Yes if the action is required to resolve the compilation error. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

	Yes	No
Change the access modifier of the variable <code>id</code> to <code>public</code> .	<input type="checkbox"/>	<input type="checkbox"/>
Change the access modifier of the <code>showId</code> method to <code>public</code> .	<input type="checkbox"/>	<input type="checkbox"/>
On lines 07 and 08, add the prefix <code>customer.</code> to <code>id</code> and <code>showId()</code> .	<input type="checkbox"/>	<input type="checkbox"/>

Correct Answer:

Answer Area

	Yes	No
Change the access modifier of the variable <code>id</code> to <code>public</code> .	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Change the access modifier of the <code>showId</code> method to <code>public</code> .	<input type="checkbox"/>	<input checked="" type="checkbox"/>
On lines 07 and 08, add the prefix <code>customer.</code> to <code>id</code> and <code>showId()</code> .	<input checked="" type="checkbox"/>	<input type="checkbox"/>

QUESTION 2

HOTSPOT

You work for Woodgrove Bank as a Java programmer.

You need to evaluate the following class. Line numbers are included for reference only.

```
01 public class Account {  
02     protected int balance;  
03     public Account() {  
04         balance = 0;  
05     }  
06     public Account(int amount) {  
07         balance = amount;  
08     }  
09 }
```

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

	Yes	No
The Account class has a single constructor.	<input type="radio"/>	<input type="radio"/>
Other classes can inherit the Account class.	<input type="radio"/>	<input type="radio"/>
Line 07 is equivalent to <code>this.balance = amount;</code>	<input type="radio"/>	<input type="radio"/>

Correct Answer:

Answer Area

	Yes	No
The Account class has a single constructor.	<input type="radio"/>	<input checked="" type="radio"/>
Other classes can inherit the Account class.	<input checked="" type="radio"/>	<input type="radio"/>
Line 07 is equivalent to <code>this.balance = amount;</code>	<input type="radio"/>	<input checked="" type="radio"/>

QUESTION 3

HOTSPOT

You work on a team that develops e-commerce applications. A member of the team creates a class named DB that connects to a database. The class contains a method named query.

You need to initiate the DB class and invoke the query method.

How should you complete the code? To answer, select the appropriate code segments in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

```
DB db =  ;
```

DB()
new DB
new DB()

```
 ;
```

db.query()
DB.query
query()

Correct Answer:

Answer Area

```
DB db =  ;
```

DB()
new DB
new DB()

```
 ;
```

db.query()
DB.query
query()

QUESTION 4

The question requires that you evaluate the underlined text to determine if it is correct.

You should use an int data type to store the numeric value 3,000,000,000 (3 billion) so that the least amount of memory is used.

Review the underlined text. If it makes the statement correct, select "No change is needed." If the statement is incorrect, select the answer choice that makes the statement correct.

- A. No change is needed.
- B. a short
- C. a byte
- D. a long

Correct Answer: D

QUESTION 5

HOTSPOT

The program is supposed to display a message to the console while it counts down from 60. The method does not work as intended.

How should you complete the code? To answer, select the appropriate code segments in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

```
public static void main(String[] args) {  
    int timer = 60;  
  
    while (timer  0) {  
          
          
          
          
  
        if (timer  0) {  
              
              
              
              
  
            break;  
        }  
        else {  
            System.out.println("The timer is counting down...");  
  
            timer ;  
              
              
              
              
              
        }  
    }  
}
```

Correct Answer:

Answer Area

```
public static void main(String[] args) {
    int timer = 60;

    while (timer ) {
        if (timer ;
        }
    }
}
```
