**QUESTION 1**

For which task should you choose Project > Automate to Sequence?

- A. export clips from a bin to a DV camera
- B. quickly assemble a rough cut of clips into a sequence
- C. place parts of clips in a sequence without setting in and out points
- D. automatically place different transitions between clips in a sequence

Correct Answer: B

QUESTION 2

An image has a particular color in it. You want all of the pixels with that color to be transparent. What is the term for this process?

- A. Mask
- B. Matte
- C. Keying
- D. Alpha Channel

Correct Answer: C

QUESTION 3

When is digital audio conformed to the project settings?

- A. when the audio is imported
- B. when the audio is edited in Premiere Pro
- C. when the project is exported to its final format
- D. when the project is completely previewed in Premiere Pro

Correct Answer: A

QUESTION 4

You are working on your sequence and realize that you chose the wrong preset when you started the project. The audio sample rate of your project is 32kHz, but the sample rate of your source media audio is 48kHz. You do NOT want to downsample your audio. What should you do?

- A. Continue working, but make sure to export the project at 48kHz.
- B. Nest the sequence in a new sequence that uses the proper sample rate.
- C. change the audio sample rate to 48kHz in the General panel of the Project Settings dialog box,
- D. Start a new project with the 48kHz setting and import the sequence you were working on into that project.

Correct Answer: D

QUESTION 5

Click the Exhibit button.

What happens if you position the cursor over the edit point of the transition graphic as shown in the exhibit, and then drag the cursor left or right?

- A. A ripple edit
- B. A rolling edit
- C. Change the transition position
- D. Change the transition duration

Correct Answer: B
