QUESTION 1

In AEM 5.6 and above, which two scenarios require that the Sling Referrer Filter's default configuration be changed? (Choose two.)

- A. A JavaScript widget on an external website will be posting comments to an AEM page.
- B. Automated scripts, using the curl command, will be executing HTTP PUT requests.
- C. The SAML Authentication Handler is used to authenticate users.
- D. The system host name does not match the external DNS name.

Correct Answer: AC

QUESTION 2

An architect needs to document the flow of content from a system that provides real-time stock quotes to an AFM system for display. The documentation must show how each server communicates and which ports are used.

Which architectural diagram should the architect modify?

- A. Conceptual
- B. Physical
- C. Logical
- D. Data Flow

Correct Answer: A

QUESTION 3

A packaged goods company is migrating its current site to AEM. The company has a presence in the US, but is expanding into two other countries within 12 months of launch on AEM.

During which two tasks should the architect consider this expansion goal? (Choose two.)

- A. Site hierarchy definition
- B. Component development
- C. Workflow implementation
- D. Content migration

Correct Answer: BD

QUESTION 4

An architect must incorporate measures to prevent content grabbing. Which two recommendations should the architect configure? (Choose two.)

- A. Apache Sling POST Servlet
- B. Apache Sling GET Servlet
- C. Dispatcher filter section
- D. Dispatcher allowed Clients section

Correct Answer: BC

QUESTION 5

An architect is conducting a discovery on a client's current CMS implementation. The architect must identify which functionality is missing from the client's current implementation.

What should the architect do?

- A. Use documentation provided by the client
- B. Speak to the key stakeholders about how to use the system
- C. Speak to the IT department about how the system is built
- D. Gain access to the system and review code

Correct Answer: B
