QUESTION 1

A marketing company needs to provide AEM Authors with Dialog/Design Dialog in their native language. The architect must ensure that non-author able content can be presented in the desired language.

Where should the architect enclose non-author-able content?

- A. Within tag
- B. Within i18n API
- C. Within XSS API
- D. Within tag

Correct Answer: B

QUESTION 2

A client acquires multiple companies that operate autonomously and want to use AEM to host all of their websites.

How should the author users be grouped?

- A. Company-specific groups for workflow approval steps and general groups for content editing
- B. General groups for workflow approval and content editing
- C. Separate company-specific groups for both content editing and workflow approval steps
- D. Default AEM groups for workflow approval and company-specific groups for content editing

Correct Answer: C

QUESTION 3

An architect is helping a multi-national news company design its project and determine requirements. The functionality requires several external feeds to display breaking news and live scores for major sporting events.

What is the most important factor for the architect to consider when meeting the performance requirements?

- A. The authentication requirements from each feed
- B. The number of JCR nodes each feed item requires
- C. The import frequency of the feed
- D. The payload type in which the feeds are returned

Correct Answer: A

QUESTION 4

A digital publisher is migrating to AEM. The primary goal is to provide a more user-friendly page authoring interface. The current content management system has been built in house by staff developers, runs on a top of a MySQL database, and uses forms for content editing. Discovery meetings are being held with the business owners and content authors. What is the most significant and relevant conceptual change from the current CMS?

- A. AEM uses a hierarchy-based repository.
- B. AEM does NOT use a relational database.
- C. AEM allows authors to drag-and-drop components to build pages.
- D. AEM is written in Java.

Correct Answer: C

QUESTION 5

Which three tasks can business users perform using AEM OOTB functionality/components/plugins? (Choose three.)

- A. Provide ratings for a particular page
- B. Present and sort order status client side
- C. Customize content using Twitter profile data
- D. Display a list of completed workflow items

Correct Answer: ACD
