QUESTION 1

You want to manage configuration profiles on a Mac that has Mavericks installed, but the Profiles preferences icon is NOT present in the System Preferences window.

What is a likely explanation?

- A. There are no profiles installed on the Mac.
- B. You are not logged in as an administrator user.
- C. Profiles have been disabled in the Security and Privacy pane of the Mac.
- D. The Mac is not enrolled with Profile Manager.

Correct Answer: A

QUESTION 2

How do you create a new website in OS X Server, without modifying the default website?

- A. In Server app, add a new web service process.
- B. In Finder, create a subfolder in the default website's folder, and add the files for the new website to that folder.
- C. In Server app, add a new website to the list of sites, and specify the folder that contains the files for the new website.
- D. In Server app, duplicate the default website folder, and add a new folder containing the files for the new website

Correct Answer: C

QUESTION 3

For the Messages app to initiate a screen sharing session between two OS X computers, screen sharing must be enabled in the Sharing preferences on at least one of the two computers.

- A. True
- B. False

Correct Answer: B

QUESTION 4

Which process will let you start up a Mac in target disk mode?

- A. Open the Start-up Disk preferences, click Target Disk Mode, and then click Restart.

B. Hold down the Option key on the keyboard as the Mac starts up, until a dialog appears, then select Target Disk Mode from the dialog.

C. Hold down the S key on the keyboard while the Mac starts up, then enter the command `reboot -target`.

D. Start up from the OS X Recovery partition, choose Target Disk Mode from the Startup Disk menu, and restart the Mac.

Correct Answer: A

QUESTION 5
