QUESTION 1

Assume that a SAS Data Integration Studio job is populating a table, and the table has metadata definitions for two simple indexes. Which of the following is NOT a valid location for viewing which columns are indexed?

- A. the Load Technique tab in the Table Loader transformation properties window
- B. the Indexes tab in the table properties window
- C. the Columns tab in the table properties window
- D. the Columns tab in the Details panel of the open job, with the table selected in the job flow

Correct Answer: A

QUESTION 2

In SAS Data Integration Studio, surrogate and retained key values are:

- A. generated by the Lookup transformation
- B. copied from source tables into dimension tables
- C. generated by the SCD Type 2 Loader transformation
- D. copied from dimension tables into source tables

Correct Answer: C

QUESTION 3

The Platform Process Manager server is part of the Platform Suite for SAS. Which statement is FALSE regarding the Platform Process Manager server?

- A. The server enables you to schedule jobs using a variety of recurrence criteria and dependencies on other jobs, time events, or file events.
- B. The server enables you to schedule jobs using a variety of recurrence criteria but does NOT allow you to specify any type of dependencies.
- C. The Flow Manager application (part of the Platform Suite for SAS) can be used to manage already scheduled jobs.
- D. Metadata for the Platform Process Manager server must be defined and must include the network address or host name of a machine as well as the port number for the server.

Correct Answer: B

QUESTION 4

When using SAS Data Integration Studio's SQL Join transformation, which SQL join type can be constructed as either an implicit or an explicit join?

- A. Union
- B. Full
- C. Inner D. Cross

Correct Answer: C

QUESTION 5

You want to create a table containing all customers from Italy. Assume that global customer order information is available in a single table. Identify the SAS Data Integration Studio transformation that will help you perform the task easily.

- A. Append
- B. Extract
- C. Lookup
- D. Mining Results

Correct Answer: B
