QUESTION 1

The configuration of the IBM Maximo Asset Management v7.5 application server security requires which two files to be configured? (Choose two.)

- A. ibm\SMP\maximo\applications\maximo\META-INF\application.xml
- B. ibm\SMP\maximo\applications\maximo\META-INF\deployment-application.xml
- C. ibm\SMP\maximo\applications\maximo\mboweb\webmodule\WEB-INF\web.xml
- D. ibm\SMP\maximo\applications\maximo\mboejb\ejbmodule\META-INF\ejb-jar.xml
- E. ibm\SMP\maximo\applications\maximo\maximouiweb\webmodule\WEB-INF\web.xml

Correct Answer: CE

QUESTION 2

What is the reason to identically configure minimum and maximum heap sizes?

- A. to avoid excessive garbage collection
- B. to avoid wasting the resources utilized in shrinking and growing the heap
- C. to allow the system to choose the correct starting point for heap allocation
- D. to allow the system to choose the correct allocation failure point for the heap

Correct Answer: C

QUESTION 3

Which design principles should be followed when application clustering is intended to address fault tolerance in the environment to some level for user interface (UI) session handling?

- A. The High Availability (HA) management design should include vertical and horizontal clustering. The UI systems should be vertically clustered. The other Java Virtual Machines (JVMs) should be horizontally clustered.
- B. The HA management design should include horizontal clustering with a minimum of 2 systems and half the total number of UI JVM on each system.
- C. The HA management design should have the number of JVMs needed to support the load of the system from a UI perspective as double what is required and be vertically clustered.
- D. The HA management design should have the number of JVMs needed to support the load of the system from a UI perspective and be able to support the UI load with a single JVM removed.

Correct Answer: B

QUESTION 4

Which two steps should be performed to implement the changes in a modified maximo.properties file?

- A. restart the database
- B. clear browser cache
- C. restart the web server
- D. build the Maximo EAR file
- E. redeploy the Maximo EAR file to the J2EE server

Correct Answer: CE

QUESTION 5

IBM Maximo Asset Management V7.1 must be at which fix pack in order to upgrade directly to V7.5.0.3?

- A. V7.1.1.4
- B. V7.1.1.7
- C. V7.1.1.10
- D. V7.1.1.11

Correct Answer: C
