Correct Answer: B

---

### QUESTION 3

It has been decided that the telnet tool should only be applied to syslog events and only accessed by the sysadmin group (which already exists).

How can this be achieved through the Tool Builder?

- A. Find the Access tab and select sysadmin and syslog Probe under Group and Class.
- B. Modify the telnet tool to use a script which checks user credentials before running the telnet tool.
- C. Find the Access tab and delete all groups except sysadmin and all classes except syslog Probe.
- D. Delete the telnet tool and create a new tool which uses a telnet executable on a server only the sysadmin group has rights to.

Correct Answer: A

---

### QUESTION 4

How does the event display change when an event is acknowledged?

- A. The acknowledged event is forwarded to the person owning the event.
- B. The acknowledged event changes to a darker shade of the same color.
- C. The acknowledged event is removed and put on the acknowledged table.
- D. The acknowledged event looks the same but has the acknowledged flag set.

Correct Answer: C

---

#### QUESTION 5

How can a deployed transformation be specified?

- A. After the page has been deployed to the console, it can be specified on the transformation definition using the transformation descriptor.
- B. The transformation cannot be deployed until it has been specified on the wire definition using the wire descriptor or when editing the page in the console user interface.
- C. After the transformation has been deployed to the console, it can be specified on the wire definition using the wire descriptor or when editing the page in the console user interface.
- D. After the wire has been deployed to the console, it can be specified on the transformation definition using the transformation descriptor or when editing the page in the console user interface.

Correct Answer: C
