**QUESTION 1**

Companies often create a collection of summary tables as their first attempt at a data warehouse. While there are several drawbacks to this approach, there are also some advantages.

Which of the following is an advantage of this approach over reporting from an operational database?

- A. It is easier to understand because there are fewer summary tables.
- B. Specific reports for which the summary tables were created will run faster.
- C. It is easy to leverage many new reports from the summary tables.
- D. Over time summary tables often naturally group into business subject areas.

Correct Answer: B

QUESTION 2

A user makes the following request: "I need to see the number of flights throughout the year that arrived or departed more than 15 minutes early or late by origin and destination airport, by carrier, and by time of day. I want to see if the number of flights delayed is greater for large carriers or small carriers." This request requires clarification to make the user's intention clear.

Which of the following will NOT further clarify the user's request?

- A. Determine if origin and destination airports should be considered joined pairs (for example, from DFW to ORD) or as separate dimensions.
- B. Determine if 15 minutes is the only significant grouping of late or early departures or arrivals.
- C. Determine the definition of a large and small carrier.
- D. Determine if Date and Time of Day should be split into separate dimensions.

Correct Answer: D

QUESTION 3
