**QUESTION 1**

A developer just wants to deliver dimension data to a table in a data mart. The dimensional framework has already been built. What should the developer create?

- A. Dimension build
- B. JobStream
- C. Metadata dimension
- D. Fact build

Correct Answer: A

QUESTION 2

Which of the following is a potential challenge when developing conformed dimensions?

- A. A developer may need to manually track changes to dimensional history by creating derived dimensions.
- B. A DataStream must be manually created for each conformed dimension's data source.
- C. A developer needs to build an operational data store (ODS) to contain the conformed dimensions.
- D. Dimensional keys may be different across source systems and need to be standardized.
- E. A developer may need to manually track changes to dimensional history by creating derivations.

Correct Answer: D

QUESTION 3

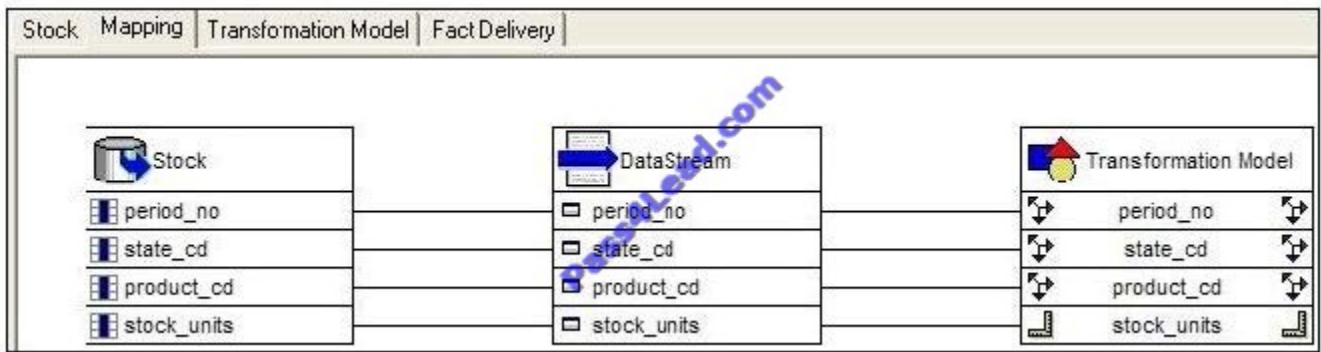

An Employee hierarchy has been created using the Hierarchy wizard. However, employee names now need to be included in the hierarchy. What should be done?

- A. Select the hierarchy and rerun the Hierarchy wizard to add an attribute to it.
- B. Manually add the Employee Name attribute to the template and to the hierarchy.
- C. Add a derivation to the dimension build to include Employee Name.
- D. Create another dimension build to populate the hierarchy with an Employee Name attribute.

Correct Answer: B

QUESTION 4

What is depicted below?

- A. How the elements of the transformation model will be output to the columns of a dimension table.
- B. How the columns of the data source map to the elements of the transformation model.
- C. How the items in the DataStream will be output to the columns of a fact table.
- D. How the elements of the transformation model will be output to the columns of a fact table.
- E. How the items in the DataStream will be output to the columns of a dimension table.

Correct Answer: B

QUESTION 5

A fact build has been created that includes a Product Code dimension element. Each incoming product code must match a corresponding row in the Product dimension. What should the developer do?

- A. Create a second dimension element in the transformation model that will check for valid product codes.
- B. Create a lookup to the dimension and reference the lookup in the Product Code element.
- C. Create an attribute element in the transformation model that will check for valid product codes.
- D. Create a template and reference the template in the Product Code element.
- E. Create an output filter and reference the output filter in the Product Code element.

Correct Answer: B
