QUESTION 1

Why would a report author consider overriding the default drill behavior?

A. To maintain the behavior of a complex edge expression after drilling, such as one which returns the top 5 members of a set.

B. To replace all members within a hierarchy when drilling through to a report with more detail.

C. To drill down to the lowest level of the hierarchy and then drill down again to display only one member.

D. To drill down on a member and have its children display as details and have the member drilled on display as summary.

Correct Answer: A

QUESTION 2

In the data source shown,

what dimensional component is selected?

A. Dimension

B. Hierarchy

C. Namespace

D. Level

Correct Answer: B

QUESTION 3

The report author wants tocreate a report to compare the sales of product types for special sales promotions in 2005 and 2006, but the report will exclude regular sales.

Which style of authoring and which function will the report author use to create this report from a cube data source?

A. Relational authoring style, except function

B. Dimensional authoring style, filter function

C. Dimensional authoring style, except function

D. Relational authoring style, filter function

Correct Answer: C

QUESTION 4

What is the default behavior when drilling down on an edge in a crosstab report?

A. The level drilled on is replaced with the entire level below it.

B. The edge expression is replaced with the children of the item drilled on.

C. All edge expressions of the crosstab are replaced with their children.

D. The edge expression is changed to another item in the query.

Correct Answer: B

QUESTION 5

Instead of prompting the user to select any countries in Europe, the report author wants to constrain the user to select one or more countries from the Northern Europe region. What kind of prompt should be used and how can this be achieved?

A. This is not possible because a prompt must always be populated with all members of a level.

B. Create a multi-select value prompt. Populate it using an expression on the [Northern Europe] member to retrieve its children on the country level.

C. Generate a prompt by creating an expression with a parameter on the crosstab edge: children([Northern Europe]->?Country?

D. Create a tree prompt, and populate it using an expression on the[Northern Europe] member to retrieve its children at the country level.

Correct Answer: B
