QUESTION 1

Jane has built an HTML page containing a Google map. She wants to show the map in a modal dialog after the user has entered a valid address in the form. What does Jane need to do to accomplish this?

- A. Jane needs to call the `launchModalDialog` function from a compute, passing an XPath reference to the instance that contains the HTML.
- B. Jane needs to call the `launchModalDialog` function from a compute, and pass a URL to the desired HTML page as a parameter.
- C. Jane needs to create a button of type `link`, and set the `launchModalDialog` property of the button to `on`. She also needs to specify a URL to the desired HTML page in the `url` property.
- D. Jane needs to create a button of type `html`, and set the `launchModalDialog` property of the button to `on`. She also needs to specify the HTML page in the `content` property.

Correct Answer: B

QUESTION 2

Which of the following list of widgets consist of XForms ONLY widgets?

- A. Section, Table, Signature
- B. HTML, Web Service, Radio, Box, Slider
- C. Case, Section, Rich Text Label, Web Service, Table
- D. HTML, Web Service, Radio, Case, Section, Rich Text Label, Table, Image, Slider

Correct Answer: C

QUESTION 3

Given the following data instance, which XForms bind returns the value of the attribute "tax" of the item with the highest tax?

```
<xml>
  <items>
    <item onsale="true">
      <name>Apple</name>
      <cost tax="0.12">6</cost>
    </item>
    <item onsale="false">
      <name>Pear</name>
      <cost tax="0">4.50</cost>
    </item>
    <item onsale="true">
      <name>Banana</name>
      <cost tax="0.75">14</cost>
    </item>
    <item onsale="true">
      <name>Orange</name>
      <cost tax="0.1">9.75</cost>
    </item>
  </items>
</xml>
```

- A. maximum(items/item/cost/@tax)
- B. max(items/item/cost/@tax)
- C. ceiling(items/item/cost/@tax)
- D. upper(items/item/cost/@tax)

Correct Answer: B

QUESTION 4

Which of the following statements regarding the benefits of using XML is FALSE?

- A. XML is extensible. Since there are no fixed set of tags, new tags can be created as they are needed.
- B. XML is based on a W3C standard, and is endorsed by software industry market leaders. Therefore, you are locked into using their technology.
- C. XML is self-describing. XML documents can be stored without schema definitions, because they contain meta data in the form of tags and attributes.
- D. XML facilitates the comparison and aggregation of data. The tree structure of XML documents allows documents to be compared and aggregated efficiently element by element.
- E. XML is simple to use. Information coded in XML is easy to read and understand. It lets you identify your information in an accurate, flexible and adaptable way, allowing for easier integration with other systems.

Correct Answer: B

QUESTION 5

Which statement below best describes XFDL functions?

- A. XFDL functions provide a way to perform complex calculations.
- B. XFDL functions can be extended via User-Defined functions.
- C. XFDL functions provide out-of-the-box functionality via two packages: viewer and system.
- D. All of the above

Correct Answer: D
