QUESTION 1

To find the status of work done by the Administration Process, which database would the administrator check?

- A. Administration Log
- B. Administration Events
- C. Administration Requests
- D. Administration Monitoring

Correct Answer: C

QUESTION 2

Which document would Dorothy use to set up automatic diagnostic data collection on an IBM Notes client?

- A. Server document
- B. NSD configuration document
- C. Desktop policy settings document
- D. Security policy settings document

Correct Answer: C

QUESTION 3

Once a Directory Assistance database is created and replicated to a server, what must be done before the database can be utilized by the server?

- A. The LDAP task must be restarted.
- B. The Administration Process must be invoked.
- C. The Extended Directory Catalog configuration document must be updated.
- D. The Server document must be updated and the IBM Domino server must be restarted.

Correct Answer: D

QUESTION 4

What type of event generator can an IBM Domino administrator set up to monitor the number of dead messages in the mail.box?

- A. server

- B. statistic
- C. database
- D. mail routing

Correct Answer: B

QUESTION 5

What is a difference between the Replace Design and Refresh Design features in IBM Notes and IBM Domino?

- A. Refresh Design will not give an option to select a new template.
- B. Replace Design will not give an option to select a new template.
- C. Replace Design can be performed only with Manager access to a database while Refresh Design can be performed with Editor access.
- D. Refresh Design of a database will remove all Design elements in a database and replace them with those from a new template. This process also resets the database properties. Replace Design will do the same thing, but the Design properties of the database will not change.

Correct Answer: A
