QUESTION 1

James has been asked to write an agent using IBM Domino Component Object Model (COM). Which statement describes COM?

A. COM does not support the New modifier for classes used on the server.

B. COM allows for connections to the backend classes to access or modify data.

C. COM allows support for the concept of web related access such as document context.

D. COM allows for access to the database by using the current environment (for example: current database, current agent, or document context).

Correct Answer: B

QUESTION 2

When is it appropriate to use the Advanced database property "Don\\'t overwrite free space"?

A. Database performance is not a factor.

B. The "% used" disk space of a database is less than 50%.

C. Data security is not an issue -- for example, in an informal discussion database.

D. The data is already secure -- for example, the database is on a server in a locked room.

Correct Answer: D

QUESTION 3

Which fields are available for programmatic access on a response document when it is initially created?
