QUESTION 1

Which statement is true regarding the Extension Library Tooltip control?

- A. A developer is allowed to place other data components in between the start and end tags.
- B. To use the beforeContentLoaded and afterContentLoaded properties, a developer must set dynamicContent to false.
- C. When the position property is set to auto, the tooltip calculates where it should display in relation to the element on the page.
- D. To use the beforeContentLoaded and afterContentLoaded properties, a developer does not need to set dynamicContent to true.

Correct Answer: A

QUESTION 2

Ken has written an IBM LotusScript agent that updates existing documents with new data. However, after the agent runs, some of the documents are giving errors while users are working with them in the user interface. Some of the data that was added is not passing the field validation tests. What can Ken do to make sure the data he is adding to the documents is valid before he saves the changes?

- A. Ken can add a call to the ValidateDocument method of the NotesDatabase class and verify that the return flag is True, indicating that there are no errors on the document prior to saving the document.
- B. Ken can add a call to the ValidateDocument method of the NotesDatabase class and verify that the return flag is False, indicating that there are no errors on the document prior to saving the document.
- C. Ken can add a call to the ComputeWithForm method of the NotesDocument class and verify that the return flag is True, indicating that there are no errors on the document prior to saving the document.
- D. Ken can add a call to the ComputeWithForm method of the NotesDocument class and verify that the return flag is False, indicating that there are no errors on the document prior to saving the document.

Correct Answer: C

QUESTION 3

What is an Editable Area?

- A. It is a Rich Text control.
- B. A control that can be added to an XPage.
- C. A Textarea that allows users to enter multiple lines of text.
- D. A region on a custom control that developers can modify when the custom control is placed on an XPage.

Correct Answer: D

QUESTION 4

Which is a valid named facet area of the Application Layout control?

- A. footerFacet
- B. titleBarTabs
- C. mastHeader
- D. mainContent

Correct Answer: C

QUESTION 5

Sam would like to use Formula Language to extract the word "cat" from the sentence: "The black cat walked under the ladder". She has assigned the sentence to the variable "MySentence". Which line of code could she use to do that?

- A. @Middle(MySentence; "cat"; 3)
- B. @MiddleBack(MySentence; 25; -3)
- C. @Left(@RightBack(MySentence; 3); 25)
- D. @LeftBack(@Right(MySentence; "cat"); 3)

Correct Answer: B
