QUESTION 1

Sanjeev wants to add a Help mode to his iWidget. At a minimum, what changes will he need to make to his iWidget definition XML so that IBM WebSphere Portal will enable a Help option for it?

- A. Add an iw:content element with a mode attribute of `\\help\\` in the iw:widget element.
- B. Add `\\help\\` to the supportedModes attribute of the iw:widget element. Add an iw:content element with a mode attribute of `\\help\\` in the iw:widgetelement.
- C. Add `\\help\\` to the supportedModes attribute of the iw:widget element. Add an iw:content element with a mode attribute of `\\help\\` in the iw:widgetelement. Add an `\\onhelp\\` Javascript method.
- D. No change needs to be made. All iWidgets in WebSphere Portal already have a Help mode.

Correct Answer: B

QUESTION 2

In the case of a processAction or serveResource call, what is the expected behavior if an action or resource parameter has the same name as a public render parameter?

- A. The public render parameter is ignored.
- B. The public render parameter values must be the last entries in the parameter value array.
- C. The public render parameter is appended with a unique identifier to distinguish it from the action/resource parameter.
- D. The public render parameter takes precedence and overwrites the value of the action/resource parameter.

Correct Answer: B

QUESTION 3

When writing a custom portlet service, what interface must be implemented to make use of the portlet service life-cycle methods?

- A. `com.ibm.portal.portlet.service.spi.PortletServiceRegistryService`
- B. `com.ibm.portal.portlet.service.spi.PortletService`
- C. `com.ibm.portal.portlet.service.spi.PortletServiceLifeCycle`
- D. `com.ibm.portal.portlet.service.spi.PortletServiceProvider`

Correct Answer: D

QUESTION 4

Quinn is creating a module that adds a customized Dojo lightbox for a disclaimer to overlay the screen as soon as the page loads using `dojo.addOnLoad`. She has already created `myLightBox.css` and intends to write the JavaScript event triggering the lightbox inline. What must Quinn do to ensure she gets the desired functionality at minimal performance cost?

- A. Quinn should add all this code right after the `theme`'s tag to ensure the functionality happens as soon as the body markup is loading.
- B. Quinn must add the tag pointing to `myLightBox.css` into the block. The JavaScript can be added anywhere therein as long as the page uses the nondeferred profile and the event is added to the event handler
- C. Quinn must create a CSS sub-contribution type in her module pointing to `myLightBox.css`. The JavaScript can be added anywhere therein as long as the page uses the default deferred profile and the event is added to the event handler.
- D. Quinn should really write all CSS and JavaScript inline for performance reasons so secondary requests to the server are never made.

Correct Answer: C

QUESTION 5

Carl is trying to create a theme based on a modularized IBM WebSphere Portal theme. He is ready for deployment, but is unsure of the structure he needs to use to accomplish this. What would be the proper deployment structure for this theme?

- A. Create a ZIP file that contains one WAR file containing the dynamic content of the theme and one JAR file containing a `.content` file referencing the static content.
- B. Create a custom version of the dynamic content from the modularized theme as a new EAR file and a custom version of the static content by creating a folder in the file store for it.
- C. Create a WAR file that contains an EAR file that includes both static and dynamic content.
- D. Create a folder for the theme in the file store, and create a WAR file containing an exact copy of this theme. All associations between static and dynamic content will be made once both are associated by sharing similar context roots.

Correct Answer: B
