#### QUESTION 1

What is the proper method for restoring the security configuration touse the federated file repository?

- A. Manually update the security.xml to point to the federated file repository.
- B. Select the "Restore file repository" option via the Configuration wizard.
- C. Run subsequent ConfigEngine tasks to disable security and then re-enable security with the file repository.
- D. Populate the restore.file.\* properties in wkplc.properties and run a ConfigEngine task to restore the default file repository.

Correct Answer: D

---

#### QUESTION 2

George is gathering requirements for an IBM WebSphere Portal implementation. Among the requirements is that the portal remembers the names of the most recently logged in users from a particular browser, so that they are not required to log in each time they visit the site. How would George best implement this requirement?

- A. George has to create a custom login portlet that reads and writes from a cookie thathe has to define.
- B. George has to develop a trust association interceptor that bypasses the portal login.
- C. George has to implement a third-party authentication mechanism.
- D. George can use the built-in Remember Me functionality.

Correct Answer: D

---

#### QUESTION 3

If errors occurduring the execution of ConfigEngine tasks, which of the following log files contain the trace information for diagnosing the configuration issues?
