QUESTION 1

Ragan is working in Designer and has inadvertently closed the Problems view. He needs to see this view to resolve errors in his XPage. How can he get the view to display?

- A. Select Show Problems View in User Preferences.
- B. The Problem View displays when Designer is restarted.
- C. Right-click the XPage design element that has the error.
- D. Use the menu option of Window > Show Eclipse Views > Problems.

Correct Answer: D

QUESTION 2

Sawyer wants to display the contents of the family members field, which contains multiple values, as a list on his contacts XPage. Which control would allow Sawyer to display multiple values in a field as a list?

- A. Use the repeat control
- B. Use the table control
- C. Use the panel control
- D. Use the database control

Correct Answer: A

QUESTION 3

Michael is creating an XPage for his company's satellite tracking application. The XPage is bound to the satinfo form as a data source that contains basic information about the requested satellite. There is also a custom control on the XPage that is bound to the maintenance form as a data source, which displays information about the satellite's maintenance history. When Michael adds a submit button to the XPage, he wants the data entered into either section to be saved to the appropriate form.

What does Michael need to do to accomplish this?

- A. Click the submit button, then select the events view. Next select the onclick mouse event, and click "Add Action". Select "Save Data Sources".
- B. Click the submit button, then select the actions view. Next select the onclick mouse event, and click "Add Action". Select "Save DataSources".
- C. Click the submit button, then select thedata view. Next select the onclick mouse event, and click "Add Action". Select

"Save Data Sources".

D. Click the submit button, then select the properties view. Next select the onclick mouse event, and click "Add Action". Select "Save DataSources".

Correct Answer: A

QUESTION 4
