QUESTION 1

Users in your helpdesk utilize shared-login-enabled IDs through a supported policy setting. They have lost the local ID file for the Notes client. Which of the following steps must be performed?

- A. You must export the ID file, send it to the user, and have the user reset the password locally
- B. The user must download the ID file from the vault, provide the old password, and immediately reset it to a new password
- C. You must reset the password if the ID is in the vault, have the user provide the new password, and then download a new copy
- D. The user must generate an ID export request from the ID vault Web interface, download the ID file and change the password

Correct Answer: C

QUESTION 2

Lotus iNotes allows features that send requests to external servers or Web services, for example, Lotus Quickr integration, to utilize which of the following to intercept calls and retrieve information from a remote site?

- A. DSAPI filters
- B. iNotes redirects
- C. HTTP-proxy servlets
- D. Web serving intercept caching

Correct Answer: C

QUESTION 3

Creating an ID vault on your Domino server requires administrator access to the server on which you create it, Editor access to the Domino Directory, and which of the following?

- A. Create databases and templates access
- B. Membership of the ID Vault Admins group
- C. The ID Vault Admin role in the Domino Directory
- D. The ID Vault secret key generated from the server ID file

Correct Answer: A

QUESTION 4

In Lotus Notes 8.5, the start-up sequence has been reordered for users. Presume that the following notes.ini entry is configured: ENABLE_EARLY_AUTHENTICATION=0

Which of the following occurs to the user experience?

- A. Users are not allowed to utilize Windows shared login
- B. Users are prompted to authenticate before the Notes workbench
- C. The Notes workbench appears, and users are prompted to authenticate
- D. Users are forced to utilize Windows shared login instead of Notes login

Correct Answer: C

QUESTION 5

Terry is working on a document in a database on a server that is DAOSenabled. While in the document, Terry replaces the attachment with a new version. Which of the following occurs to the attachment in the DAOS store?

- A. The server adjusts references to the attachment in DAOS
- B. The server removes the reference from all mail files that pointed to that original file reference
- C. The server removes the previous attachment entirely from DAOS and inserts the link to the new attachment
- D. The server sends the full previous attachment to all user mail files that pointed to that original file reference

Correct Answer: A
