QUESTION 1

After installing and configuring IBM Content Search Services, a specialist submits a test index job and monitors the job status using the Index Jobs Management tool in Administration Console for Content Platform Engine. After several minutes, the job status does not indicate progress.

Which log file is most likely NOT to contain useful information for resolving this problem?

- A. IBM Content Search Services log files.
- B. The p8_server_error.log file on the Content Platform Engine server.
- C. The application server log files on the IBM Content Navigator server.
- D. The application server log files on the Content Platform Engine server.

Correct Answer: A

QUESTION 2

A customer needs to change the logging level of the IBM Content Search Services server to determine the cause of an indexing failure.

What are two different logging levels that can be set using the IBM Content Search Services command-line administration tool?

- A. Fatal
- B. Finer
- C. Trace
- D. Debug
- E. Warning

Correct Answer: BE

QUESTION 3

A company recently added a new department of users to the IBM FileNet P8 system. A new realm was also created specifically for this new department, but has yet to be configured in the directory configuration for the FileNet P8 Domain. Alice is a user in the existing configured realm and also part of a nested group that was setup for the new department.

Alice cannot log onto IBM Content Navigator. The administrator logs into the IBM Administration Console for Content Platform Engine (ACCE) to review the Directory Configuration properties.

Which property should the administrator review to resolve the problem?

- A. Group name Attribute
- B. Group membership Search Filter
- C. Search Cross Forest Group Membership
- D. Restrict Membership to Configured Realm

Correct Answer: D

QUESTION 4

Which of the following statements about half maps is true?

- A. Half maps create a deploy dataset.
- B. Half maps analyze objects for import.
- C. Half maps store environment specific data.
- D. Half maps are used to create an export manifest.

Correct Answer: C

QUESTION 5

To verify a file storage area, you log onto the machine where the Content Engine Server is installed and examine the contents of the file storage area directory. This directory should contain which of the following objects?

- A. Two subdirectories -- content and inbound
- B. Three subdirectories -- content, inbound and outbound
- C. An XML file, named fn_stakefile, and two subdirectories, content and inbound
- D. An XML file, named fn_stakefile, and two subdirectories, inbound and outbound

Correct Answer: C
