After examining the results of this investigation as shown in the exhibit, which mask type was used to produce the results?

- A. C
- B. N
- C. T
- D. X

Correct Answer: C

QUESTION 2

You re-ran a job to update the match frequency. This match frequency file is used in your test environment configuration on Match Designer. What action would you take to insure the most current Frequency file is used?

- A. No action is required.
- B. You need to open Test Environment and click [Update].
- C. You need to open Data Table Definition and click [Update].
- D. You need to click [Test All Passes] to apply changes in the match frequency.

Correct Answer: B

**QUESTION 3**

When would you use the 'At Least One' survive technique?

- A. Some records have fields with Null values.
- B. You want the last record in a match group to survive.
- C. You want the first record in a match group to survive.
- D. You want to ensure that a record from each match group survives.

Correct Answer: D

QUESTION 4

After investigating the client data, it shows that 45% of the data is from the US, 30% from Canada and 25% from Mexico. You look in the Standardization Rules folder in Designer and don't see a rule for Mexico. What should you do to expedite standardizing the data from Mexico?

- A. Run the Mexican data through the Spanish rules set.
- B. Write a custom rule set for Mexico and run the Mexican data through it.
- C. Find the rule set for Mexico in the /QSRules folder, import the rule set using istools and run the Mexican data through it.
- D. Copy the US rule set from the /Quality folder using istools, make the appropriate changes for Mexico and run the Mexican data through it.

Correct Answer: C

QUESTION 5

You modified your standardization rule set but the standardization output still appears to be the same. How should you solve the problem?

- A. Re-compile the job.
- B. Provision the rule set.
- C. Force-compile the job.
- D. Fix the invalid statements in the pattern file.

Correct Answer: B
