Following Questions and Answers are all new published by IBM Official Exam Center

QUESTION 1

When creating a session bean, the default selection for the session bean is to create a remote client view instead of a local client view. This is because:

A. Even though a local client view is available, it is a best practice to never use a local client view in a session bean.

B. Session beans are normally used to implement facades, and as such, require remote interfaces as opposed to local interfaces.

C. A remote client view is easier to use.

D. Local client view for session beans has been deprecated.

Correct Answer: B

QUESTION 2
