QUESTION 1

Given an IBM Security Identity Manager test environment which is a valid option for testing thousands of TDI/RMI adapters?

- A. Point IBM Security Identity Manager test environment services to production environment end points to be managed
- B. Use the threaded_damlservice.pl script from the IBM Security Identity Manager tuning guide
- C. Install thousands of separate TDI dispatchers
- D. Use the virtual service adapter setup

Correct Answer: C

QUESTION 2

How would you create an organizational structure in ISIM for a customer to manage 50,000 users and 900 servers?

- A. Create an organization structure where users can be placed into multiple user OUs based on placement rule that evaluates user attributes. Services on which a user can have accounts must be defined in the same OU as the user.
- B. Create an organization structure where users can be placed into multiple user OUs based on placement rule that evaluates user attributes. Services on which a user can have accounts can be defined in a separate OU.
- C. Create two separate OUs for users and services. All users need to be in the same OU in ISIM, and organization roles must be defined at level that is higher than the user OU.
- D. Create a single Organizational Unit (OU) under the default Organization to anchor users and services and their associated policies.

Correct Answer: C

QUESTION 3

In the forms designer, what is the difference between a Search Control type and a Listbox type with custom search values?

- A. A Search Control type will return the DistinguishedName(s) of the resulting object(s), while the Listbox type with custom search values can return any attribute of the resulting object(s).
- B. A Search Control type can return any attribute of the resulting object(s), while the Listbox type with custom search values will return the DistinguishedName(s) of the resulting object(s).
- C. A Search Control type can only be executed on data in the ISIM Directory Server, while a Listbox type with custom search values can be executed on data external to ISIM.
- D. A Search Control type will return only one value from a search, while a Listbox type with custom search values can return more than value from a search.

Correct Answer: C

QUESTION 4

Which is TRUE concerning the configuration of Reminder Interval within Workflow Notification Properties?

- A. Reminder Interval can be overridden within individual workflow activities
- B. Reminder Interval must be greater than the default escalation limit
- C. Reminders can be suppressed by setting Reminder Interval to 0
- D. Reminder Interval is specified in days

Correct Answer: D

QUESTION 5

Which two statements are correct for a loop node in a workflow? (Choose two)

- A. Nodes inside a loop can transition to activities outside the loop provide `process.goto("Activity_ID")` is used on the transition.
- B. To retrieve an instance of an activity in a loop, the `process.getActivity` method is passed two parameters.
- C. The loop node does not specify the results of the nodes in the loop.
- D. `loopcount` is a local variable available only in the loop node.
- E. Index of activities in a loop starts with zero.

Correct Answer: BC
