**QUESTION 1**

A large bank has a paper-based process for transferring funds between regional centers that takes days to complete. They want to use SOA to automate this process.

As an SOA Designer, what is a likely reason to also include Partner Services?

- A. The automated process needs to provide self service and status tracking of the process to its users.
- B. The funds transfer process involves service calls to an internal workflow that controls the final step.
- C. There is a requirement to use Extract/Transform/Load (ETL) to move information from one service to another.
- D. There is a business requirement to conform to interchange standards like Society for Worldwide Interbank Financial Telecommunication (SWIFT).

Correct Answer: D

QUESTION 2

A midsize city is experiencing rapid growth that requires extensive changes in city land use regulations. Under this pressure, many land use disputes are getting caught in endless inter- departmental exchanges to complete data collection using a variety of completion criteria. This is angering both citizens and land developers. Which approach to SOA is likely to have the greatest impact?

- A. Apply governance policies and procedures to control inter-departmental exchanges.
- B. Align the departments with a common end-to-end process with shared business services.
- C. Align the departments with a common data model and data access services to avoid confusion and duplication.
- D. Create citizens portals to provide a mechanism for citizens to more easily monitor and manage their role in the process.

Correct Answer: B

QUESTION 3

A hospital had fully federated its patient databases when patient privacy laws were passed. The CIO expects more regulation in the future. Which high level design pattern should the SOA Designer use to best address this nonfunctional requirement?

- A. Direct Exposure
- B. Indirect Exposure
- C. Web Service Proxy
- D. Requester Side Caching

Correct Answer: B

**QUESTION 4**

A credit check company wants to enter the Software as a Service (SaaS) market with their primary application on a global scale. The current application is entirely mainframe based. The SOA solution is required to offer the same functionality

and Quality of Service (QoS) for the existing internal users as well as the new external users.

Which design pattern or patterns should be used?

- A. Self-Service pattern
- B. Extended Enterprise pattern
- C. Zoned Enterprise Service Bus (ESB) and Collaboration patterns
- D. Self-Service and Exposed ESB Gateway patterns

Correct Answer: D

QUESTION 5

A company is evaluating how to implement single sign-on authentication in an HTTP-based environment. The goal is to allow them as service provider A to redirect to an outside service provider B and pass along information that proves the user is already authenticated.

Which specification most accurately addresses the requirement?

- A. WS-Trust
- B. WS-Security
- C. WS-Federation
- D. WS-Token

Correct Answer: C
