QUESTION 1

When a program is called using an unqualified call, in what order is the job's library list searched for the program?

Example: CALL PAYROLL instead of CALL PAYLIB/PAYROLL

- A. Current library, User libraries and System libraries.
- B. User libraries, Current library and System libraries.
- C. System Libraries, User libraries and Current library.
- D. System Libraries, Current library and User libraries.

Correct Answer: D

QUESTION 2

A user uses an application to submit job APP1. However, APP1 remains in the job queue. No other jobs are running in the subsystem and the job queue only contains APP1. What is a potential cause for APP1 remaining in the job queue?

- A. The job is in a scheduled state.
- B. The user does not have *JOBCTL special authority.
- C. The job does not have an available activity level.
- D. The user has *USEauthority to the job queue and *EXCLUDE authority on the subsystem.

Correct Answer: A

QUESTION 3

What is an advantage of using an authorization list instead of a group profile?

- A. Authorization lists override individual object authority.
- B. An object can be authorized by many authorization lists, but only one group profile.
- C. Authorization lists provide *ALLOBJ access to both objects and programs used to update.
- D. Authorization lists allow different users to have individual authorities to the secured objects.

Correct Answer: D

QUESTION 4

Default job descriptions are set so that they always use the system values QSYSLIBL and QUSRLIBL to construct library lists. A new application is installed and has a custom subsystem and job descriptions to run the application jobs.

The

new application is not updating the production data.

What is the most likely reason for the problem?

- A. The application job description has a newINLLIBL specified.
- B. The application subsystem specifies a new class that sets the library lists.
- C. The application users do not have authority to the production data libraries.
- D. The Subsystem library and current library override the default user library list.

Correct Answer: A

QUESTION 5

User HOK tries to login and received the message "User profile cannot sign on." What is the most likely cause for the error?

- A. The user\'s profile has been deleted.
- B. The user\'s profile has been disabled.
- C. The QMAXSIGN system value is set to 1.
- D. The QMAXSGNACN system value is set to 1.

Correct Answer: B
