QUESTION 1

What is a characteristic of the CA Introscope boundary blame feature?

A. Boundary blame is disabled by default.

B. Disabling Boundary blame in an agent will generate fewer metrics than an agent with boundary blame enabled.

C. The boundary blame metric tree provides visibility to each component in the stack, showing a called component for every calling component.

D. Boundary blame gives visibility into the front-end components and the back-end component with all components between these two not in the blame stack.

Correct Answer: D

QUESTION 2

When default metrics are generated during application execution, the probes:

A. Retain data until agents collect it.

B. Report data directly to the Enterprise Manager.

C. Report data to agents, which in turn pass it to the Enterprise Manager.

D. Report data to agents, which retain it until the Enterprise Manager collects it.

Correct Answer: C
