QUESTION 1

Two features of global policies are:

- A. they are different for each domain and apply to users in all user directories.
- B. they are different for each domain and apply only to a single user directory.
- C. they belong to a generic global domain and apply to users in all user directories.
- D. they belong to a generic global domain and apply only to a single user directory.

Correct Answer: C

QUESTION 2

In your company, authentication information is stored in a central Oracle repository. However, authorization information is spread across several different SQL Server and Oracle user directories associated with specific applications. The Social Security Number (SSN) of employees is common to all user directories. You are likely to use Lightweight Directory Access Protocol (LDAP) directories in the near future. Which statement about CA SiteMinder directory mapping options is TRUE?

- A. It is best to use the identical DN method to map LDAP directories to the central Oracle repository.
- B. When mapping relational database directories to each other, Universal ID is the only method available.
- C. When mapping LDAP user directories to the central Oracle repository, Universal ID is the only method available.
- D. You can choose between the Universal ID and Identical DN methods when mapping relational databases with the central Oracle repository for authentication.

Correct Answer: C

QUESTION 3

Which feature characterizes Policy Server clusters?

- A. They have a default failover threshold of 50%.
- B. They are defined as part of a Host Configuration Object (HCO).
- C. They include a secure network channel between all Policy Servers and the Monitor processes.
- D. For distributed monitoring, each Policy Server monitors all the other Policy Servers in the cluster.

Correct Answer: B

QUESTION 4

Which statement about the CA SiteMinder Extensible Policy Store (XPS) is TRUE?

- A. It exports to .dtd files.
- B. It cannot co-exist with legacy policy stores.
- C. New applications can be added without altering the schema.
- D. It uses the new CA SiteMinder Data Interchange Format (SMDIF).

Correct Answer: C

QUESTION 5

The Active Directory Global Catalog feature is useful in a multi-domain forest where it provides a central repository of domain information for the forest by storing partial replicas of all domain directory partitions. When integrating Active Directory with CA SiteMinder, which Global Catalog- related limitation do you need to consider?

- A. Load balancing and failover are not supported when you use Global Catalog.
- B. Password Services is not supported because Global Catalog does not support writes.
- C. A Policy Server cannot communicate with an Active Directory Global Catalog User Store.
- D. A Policy Server can communicate with an Active Directory Global Catalog User Store but cannot operate in Federal Information Processing Standards (FTPS) mode.

Correct Answer: B
