QUESTION 1

When you create a custom vendor certification, which steps do you need to perform? (Choose three)

- A. Select a metric family.
- B. Specify a vendor name.
- C. Define a metric expression.
- D. Create a notification profile.
- E. Select a management information base (MIB).

Correct Answer: ACE

QUESTION 2

As the Global Administrator of a CA Performance Management instance that hosts three tenants, you are only able to see two of the five available SNMP profiles. Why are you unable to view all five profiles?

- A. Because in this instance, two profiles are associated with the tenant you are currently administering
- B. Because Global Administrators typically need to refresh the screen before the full set of profiles appear
- C. Because the Global Administrator must change an entry in the SNMP_549.xml file to see all SNMP profiles
- D. Because the tenant administrators must change the permission of the SNMP profiles that they manage to enable the Global Administrator to see them

Correct Answer: A

QUESTION 3

In CA Performance Management, metric families are used to tie the vendor certifications to:

- A. Monitoring profiles
- B. Tenant groups
- C. SNMP profiles
- D. IPdomains

Correct Answer: A

QUESTION 4

In CA Performance Center, permission groups:

- A. Are always read-only copies of system or custom groups.
- B. Are custom groups that organize managed items for data access purposes.
- C. Are known as context groups until they are assigned to user accounts as permission sets.
- D. Are used to group users who have common access requirements to selected data sources.

Correct Answer: B

QUESTION 5

When you review the list of management information bases (MIBs) on the Select NIB page of the Create Vendor Certification wizard, an error message indicates that a MIB did not compile. Which steps might help you resolve the issue? (Choose two)

- A. Delete all unused MIBs.
- B. For dependency errors,upload the missing MIBs.
- C. For the relevant Data Aggregator data source,on the Polled Metric Families tab,click Update Configuration.
- D. For syntax errors,check the error message,correct the syntax error in the MIB,and import the corrected MIB.

Correct Answer: BD
