QUESTION 1

Which of the following is the BEST example of maintaining strategic flexibility?

- A. Cloud provisioning models have a risk of not maintaining flexibility once services have been migrated.
- B. When choosing services to migrate into the cloud, there should be a focus on ensuring that future migration between different cloud providers can be facilitated.
- C. Cloud providers need to provide countermeasures to any consequences of not maintaining flexibility of services in a strategic manner.
- D. When choosing services to migrate into the cloud, it should be ensured that the cloud provider can change underlying hardware platforms in case the customer needs change.

Correct Answer: B

QUESTION 2

When there is a higher demand for a company's product, which of the following is a cloud characteristic that allows the company to manually provision additional servers, through a shopping cart?

- A. Automation
- B. Self-service
- C. Scalability
- D. Rapid elasticity

Correct Answer: C

QUESTION 3

Which of the following is the primary way to access PaaS?

- A. Web services
- B. Websites
- C. Web hosting providers
- D. Data integrations

Correct Answer: A

QUESTION 4

Which of the following correctly identifies a key difference between cloud computing and IT outsourcing?

- A. Typically, industry definitions state that cloud computing and IT outsourcing are synonymous terms with the same meaning.
- B. Cloud computing only works when there is satisfactory Internet connectivity whereas outsourcing requires dedicated WAN links.
- C. Cloud computing generally allows for on-demand utilization, whereas outsourcing is typically defined by contract terms.
- D. Cloud computing provides only external IT equipment to a company whereas outsourcing involves external only resources managing internal company equipment.

Correct Answer: C

QUESTION 5
