**QUESTION 1**

In Report Studio, an author wants the report title to appear in the language in which the report is run. What property of the report header must the author define to create this variable?

- A. Style Variable
- B. String Variable
- C. Render Variable
- D. Text Source Variable

Correct Answer: D

QUESTION 2

Which statement is true about using a burst key to burst reports?

- A. A burst key can be added to a crosstab report.
- B. A burst key can be added to a list report.
- C. A burst key can be added to a chart report.
- D. A burst key can be added to a map report.

Correct Answer: B

QUESTION 3

In Report Studio, an author creates a list report and adds four data items. The author then adds a crosstab to the report. Which of the following is true?

- A. Report Studio creates a new query for the crosstab report.
- B. Report Studio populates the crosstab with the four data items from the list.
- C. Report Studio links the crosstab to the same query as the list report.
- D. Report Studio automatically filters on data items that the list is filtered on.

Correct Answer: A

QUESTION 4

In the report shown,

users click on the Product line link to navigate to the specific product line in the list below. Users can also click on the Top link to return to the Product line list at the top of the report. Bookmarks are used to control this drill-through behavior. How is each of the drill-throughs defined for this report to function as described?

- A. Product line drill-through: bookmark source type = Text, where Text =Top;Top drill-through: bookmark source type = Data Item Value, where Data Item = Product line
- B. Product line drill-through: bookmark source type = Data Item Label, where Data Item = Product line;Top drill-through: bookmark source type = Text, where Text =Top
- C. Product line drill-through: bookmark source type = Data Item Value, where Data Item = Product line;Top drill-through: bookmark source type = Text, where Text =Top
- D. Product line drill-through: bookmark source type = Text, where Text = Top;Top drill-through: bookmark source type = Data Item Value, where Data Item = Product line

Correct Answer: C

QUESTION 5

In Report Studio, an author creates the following report:

Product line	Revenue
<Product line>	<Revenue>
<Product line>	<Revenue>
<Product line>	<Revenue>

The author wants each row of this report to contain a column chart displaying quantity sold for a particular product line. How can the author ensure that the chart in each row displays data for only the product line that appears in the same row?

- A. Add a column chart to the list, link the column chart to the same query used for the list and then add data to the chart.

B. Add a column chart to the list, add data to the chart and then create a union relationship between the queries for the list and the chart.

C. Add a column chart to the list, add data to the chart and then create an intersect relationship between the queries for the list and the chart.

D. Add a column chart to the list, add data to the chart and then create a master-detail relationship between the queries for the list and the chart.

Correct Answer: D
