QUESTION 1

A developer has created a fact build with two fact deliveries. What should be done to include only some of the elements of the transformation model in one of the deliveries, and some in the other delivery?

A. Modify the properties of each fact delivery to exclude the relevant elements.

B. Create an output filter to exclude the relevant elements from each delivery.

C. Modify the SQL to exclude the relevant elements from each delivery.

D. Create a level filter to exclude the relevant elements from each delivery.

Correct Answer: A

QUESTION 2

A text file contains a row at the top that only identifies the names of the columns. In order for this file to be processed successfully, what must the developer do in SQLTXT Designer?

A. Specify CR as the record delimiter.

B. Specify NL as the record delimiter.

C. Specify that the header row ignore limit is one.

D. Specify that the file contains one header line.

Correct Answer: D

QUESTION 3

A developer wants to copy data from one table to a table in another database. What type of fact build would be the most appropriate for the developer to specify in the Fact Build wizard?

A. Cognos BI Mart (Snowflake)

B. Data transfer

C. Cognos BI Mart (Star)

D. Relational datamart

Correct Answer: B

QUESTION 4

Some incoming fact data has invalid product codes. The developer wants to accept this fact data and assign the necessary surrogate keys in the dimension table. What can be done to accomplish this?

A. Accept unmatched member identifiers in the measure element properties.

B. Modify the SQL for the reference structure to exclude the missing product codes.

C. Accept unmatched member identifiers in the dimension element properties and save unmatched member details via reference structure.

D. Add a derived dimension element to the fact build to store the missing product codes and unsubscribe the element from the delivery module.

Correct Answer: C

QUESTION 5

In which Data Manager object does a developer specify the attributes of a conformed dimension, such as the surrogate keys that it contains?

A. Reference dimension

B. Connection
