QUESTION 1

Which of the following are the prerequisites for automatic total planning for the articles in a distribution center? (Choose two)

A. There must be entries for the articles in the planning file.

B. The articles must have a valid purchase price.

C. The Requirements planning indicator must be set in the site master record of the distribution center.

D. Rounding profiles must be assigned to the articles.

Correct Answer: AC

QUESTION 2

How can you simplify master data maintenance for replenishment for a large number of articles and stores? (Choose two)

A. In the site profile

B. Through mass maintenance of logistics data

C. In the requirement groups

D. Inventory management on merchandise category basis

Correct Answer: BC

QUESTION 3

In your company, you are responsible for creating Article Master Data. As you create a new article master record, on the initial screen you leave the Reference Article field blank. On the Basic Data view the description field already has a description in it.

Where did the description value come from?

A. Merchandise Category

B. Article Category

C. Article Hierarchy

D. Article type

Correct Answer: A

QUESTION 4

Article Master Data is required for the replenishment run and can be displayed on the parameter overview window.

The replenishment master data is maintained on which view in the Article Master?

A. Logistics DC View

B. Purchasing View

C. Logistics Store View

D. POS View

Correct Answer: C

QUESTION 5

Which of the following needs to be considered when using the replenishment based inventory management procedure?

A. Only the unrestricted-use stock type is monitored.

B. Documents are created for all goods movements.

C. Different stock types are monitored.

D. Documents are created for goods receipts only.

Correct Answer: A
