QUESTION 1

The Remodeling Toolbox allows you to define:

A. Several subsequent remodeling steps for your most important BI Objects like Queries, InfoProviders and Process Chains.

B. A single remodeling step for InfoCubes or DataStore Objects. Before executing the remodeling process the corresponding InfoProviders have to be emptied.

C. Several remodeling steps for an InfoCube without the need to empty this InfoCube. Remodeling steps can, for example, include adding key figures, or replacing characteristics.

D. A remodeling rule for a process chain, including an integrated batch process consumption check and rescheduling.

Correct Answer: C

QUESTION 2

What are key benefits in using the BI Accelerator? (Choose three)

A. Fast and stable query response times

B. Reduced need of aggregates

C. Predictable data load processing times

D. Reuse of database-specific optimization features

E. High scalability

F. Reduced memory consumption of OLAP Cache

Correct Answer: ABE

QUESTION 3

Which of these statements about BI Content are correct? (Choose three)

A. Industry-specific BI Content is developed.

B. BI Content speeds up BI implementation.

C. BI Content includes DataSources in SAP source systems.

D. Before activating BI Content for SAP source systems, BI Content DataSources have to be activated manually in transaction SBIW in the SAP source system.

Correct Answer: ABC

QUESTION 4

If two queries are inserted into the same worksheet in a workbook, which of the following is a potential conflict?

A. The results for one query could affect the results for the other query.

B. The first query on the worksheet is the only query accessible by the user.

C. If the user drills down in the first query, the query result could possibly extend into the area occupied by the second query.

D. The security settings of the first query would override the security settings of the second query.

Correct Answer: C

QUESTION 5

Where can variables be created? (Choose two)

A. In the query definition where they are needed.

B. In the BEx Web Application Designer, in the "Data Provider" field.

C. While using a web browser to view query results.

D. When defining exceptions and conditions.

Correct Answer: AD
