QUESTION 1

Which of the following statements regarding ATP checks in SAP ECC that are triggered from customer orders is correct?

A. An ATP check creates fixed links between customer orders and their confirmed receipts.

B. The ATP check does not take stocks and receipts into account. It checks consumption of planned independent requirements.

C. If the ATP check determines non-availability. It then checks in the next step whether it is possible to procure or produce in time.

D. The ATP quantity is the available quantity, which can be used to confirm incoming customer orders.

Correct Answer: C

QUESTION 2

An enterprise wants to use SAP ECC requirements planning together with the NETPL procedure (net change planning in the planning horizon). The planning horizon should be set equally for all materials by default. However, some materials need to have a different planning horizon. What procedure do you recommend for setting the planning horizon?

A. Set the planning horizon in the MRP groups in Customizing and assign variant entries via the plant parameter settings.

B. Set the planning horizon in Customizing using the plant parameter settings and assign variant entries via the MRP groups for the corresponding materials.

C. Set the planning horizon in the MRP groups in Customizing and store the variant values in the material masters for the corresponding materials.

D. Set the planning horizon in the plant parameters in Customizing and store variant entries in the material masters for corresponding materials.

Correct Answer: B

2.

 Lot sizing

3.

 Scheduling

4.

 Determination of the procurement type

C. 1. Net requirements calculation

2.

 Lot sizing

3.

 Determination of the procurement type

4.

 Scheduling

D. 1. Availability check

2.

 Lot sizing

3.

 Determination of the procurement type

4.

 Scheduling

Correct Answer: C

QUESTION 5

You want to produce a finished product only when it is requested by a customer order in make-to- order production. However, all assemblies need to be procured beforehand.

How can you fulfill these requirements in SAP ECC? (Choose two)

A. Use strategy 30 (production by lots) for the finished product and strategy 70 (planning at the assembly level) for all assemblies in the bill of material.

B. Use strategy 40 (planning with final assembly) for the finished product and strategy 70 (planning at the assembly level) for all assemblies in the bill of material.

C. Use strategy 50 (planning without final assembly) for the finished product and no strategy for all assemblies in the bill of material.

D. Use strategy 20 (make-to-order production) for the finished product and strategy 70 (planning at the assembly level) for all assemblies in the bill of material.

Correct Answer: CD
