QUESTION 1

How do the condition type and condition records for rebate agreements vary in comparison to condition types and records for standard discounts? (Choose two)

- A. In the maintenance of scales
- B. In the maintenance of accrual rates within condition records
- C. In the usage of different calculation types
- D. In the usage of different condition classes

Correct Answer: BD

QUESTION 2

Your company decided to change the price of a material and wants to keep a pricing history. How can you update the condition records?

- A. Change the price within the sales order to update the condition record.
- B. Change the pricing condition record.
- C. Create a new pricing condition record using a template.
- D. Change the price using the update function of the condition type.

Correct Answer: C

QUESTION 3

You have set up condition type K029 as a gross-weight-calculated discount based on the material group. You now want to implement this for ordered materials belonging to the same material group. The system

should accumulate the gross weight of the items to determine the scale rate.

For the required weight accumulation, which of the following must you use for condition type K029?

- A. Group condition
- B. Condition supplements
- C. Scale basis
- D. Scale formula

Correct Answer: A

QUESTION 4

As a member of the project team, you are asked to set up the system so that a user has to enter an order reason when he or she processes a sales order. It should be possible to save the incomplete order, but further processing should not be possible until the Order Reason field is filled.

How do you implement this requirement?

- A. Define an incompleteness procedure with the Order Reason field and assign a status group in which the General, Delivery, and Billing Document fields are selected.
- B. Define an incompleteness procedure with the Order Reason field and assign it to a sales document type that has the "Incompletion Message" indicator set.
- C. Define an incompleteness procedure with the Order Reason field and mark it as mandatory.
- D. Define an incompleteness procedure with the Order Reason field, assign it to the sales document type, and set the status to "released for further process steps."

Correct Answer: A

QUESTION 5

Which of the following statements regarding the material master data are correct? (Choose two)

- A. The behavior of a sales order item depends on the assigned item category group of the material master.
- B. If a delivering plant is defined in the sales data of the material master, this plant is transferred to a corresponding sales document item and can no longer be changed.
- C. The following information in a sales order is derived from the material master: material group, weight, and item category.
- D. The sales views of the material master data can be maintained for various combinations of sales organization and distribution channel.

Correct Answer: AD
