QUESTION 1

An architect is asked to improve an internal online library of the organization\\\'s images and video clips. They want users to be able to make edits to the existing content and add new objects to the library. Which Documentum product should be used to replace the current library?

A. Webtop

B. xCP

C. Web Development Kit

D. Digital Asset Manager

Correct Answer: D

QUESTION 2

When using a web client, which software component makes the connection to the Content Server software?

A. DFC

B. Internet browser

C. application server

D. operating system

Correct Answer: A

QUESTION 3

What do virtual documents in a Documentum repository do?

A. streamline the production of documents by normalizing their formats

B. ensure data integrity by enforcing access control at the document level

C. capture user actions by virtualizing the documents upon which they work

D. combine multiple documents in multiple formats into a single document

Correct Answer: D

QUESTION 4

What is a Documentum relationship?

A. A Documentum relationship is an association between several objects in the repository in form of a virtual document.

One object is the root, several objects form the children.

B. A Documentum relationship is an association of the same object within several folders in the form of links. One document is the source and is related to different folders.

C. A Documentum relationship is a formal association between two objects in the repository. One object is designated as the parent and one object is designated as the child.

D. A Documentum relationship is an association of the same content file to different object versions in the form of a rendition. The rendition is the native content to which all other versions are bound.

Correct Answer: C

QUESTION 5

A user wants to search for a document whose subject is set to "server" or "Server." Which DQL query will do this?

A. select object_name from dm_document where subject like \\'%erver\\'

B. select object_name from dm_document where subject = \\'Server\\'

C. select object_name from dm_document where upper(subject) = \\'SERVER\\'

D. select object_name from dm_document where upper(subject) = \\'Server\\'

Correct Answer: C
