Which attribute does an unmaterialized lightweight sysobject (LWSO) share with its parent?

- A. i_folder_id
- B. i_vstamp
- C. subject
- D. r_page_cnt

Correct Answer: A

QUESTION 4

A company has a mainframe application that produces customer invoice and billing information through print stream operations. Often a call center representative has to request this information to be re-printed or has to look for it in a filing cabinet.

Which product will provide a solution to capture print stream formats, convert them to PDF and import them into the Documentum repository?

- A. Process Integrator
- B. Print Control Services
- C. Archive Services for Reports
- D. Advanced Document Transformation Services

Correct Answer: C

QUESTION 5

An activity in a parent workflow needs to initiate a child workflow. The parent workflow needs to proceed execution only after the child workflow completes. How can this be achieved?

- A. Wait for an event in the Content Server and send a notification to the parent workflow when the child workflow completes.
- B. Wait for an event in an activity of the parent workflow and send the event to the parent workflow when the child workflow completes.
- C. Wait for an event in an activity of the parent workflow and send a notification to the parent workflow when the child workflow completes.
- D. Wait for an event in the Documentum Messaging Services and send the event to the parent workflow when the child workflow completes.

Correct Answer: B
