QUESTION 1

Given the following code, what IDfSysObject method is used to determine if it can be promoted?

- A. canPromote()
- B. IsPromotable()
- C. getCanPromote()
- D. getIsPromotable()

Correct Answer: A

QUESTION 2

Which setting controls the format of DFC logging messages created by calls to DfLogger?

- A. entries in the log4j.properties file
- B. server.ini settings on the Content Server
- C. regional settings in the operating system
- D. the locale setting of the session in which the log messages are created

Correct Answer: A

QUESTION 3

Which interface conforms to the Web Service Framework (WSF) restrictions on arguments and return types?

- A. IDfTime
- B. IDfPersistentObject
- C. IDfList
- D. IDfSession

Correct Answer: A

QUESTION 4

What does the following code do?

- A. adds a new group called "topsecret"
- B. adds a new dynamic group called "topsecret"

C. adds the user associated with the current session to the "topsecret" dynamic group

D. adds a group called "top secret" to the DFC cache, which can later be used to complete creation of a new dm_group object

Correct Answer: C

QUESTION 5

Which statement is true about the collection returned by IDfSysObject.getVersions()

A. It has a fixed number of fields in the result set that cannot be extended.

B. It must be closed after the code has processed the list of versions returned.

C. It only returns versions with symbolic labels.

D. It does not have to be closed because it did not result from IDfQuery.execute().

Correct Answer: B
