**QUESTION 1**

An application developer is creating a business process template and needs to ensure that certain pieces of data that are included within a structured data type will be persisted in the repository after the workflow completes. To which location should the structured data type data be mapped?

- A. process parameters
- B. process variables
- C. attributes of a package
- D. no mapping is required

Correct Answer: C

---

**QUESTION 2**

A process dashboard contains four dashlets called A, B, C, and D. Managers should be allowed to view all four dashlets, but task processors should only be allowed to view dashlets A and C.

How can a dashboard designer satisfy this requirement?

- A. Set the permissions on each dashlet to grant access to the appropriate users.
- B. Add a new dashlet to the dashboard and configure dashlets A and C as drill-down targets of this new dashlet.
- C. Configure a mandatory filter for the dashboard that displays dashlet information based on user profile.
- D. Create a second dashboard that contains only dashlets A and C and provide appropriate role-based access to each dashboard.

Correct Answer: D

---

**QUESTION 3**

When using Forms Builder, an application developer has two form templates sharing the same data model.

What type of change on one of the templates will invalidate the shared template?

- A. renaming the form template
- B. modifying the storage mapping
- C. renaming a data item
- D. renaming a UI control

Correct Answer: C

---

#### QUESTION 4

A TaskSpace application uses a custom folder type to store information about a case and must display case information as users navigate subfolders.

What is the EMC recommended approach for satisfying this requirement?

- A. Create a folder information template for the custom folder type and use it in a TaskSpace folder tab.
- B. Add a folder content view control in an electronic form template and map the folder type to it in the TaskSpace configuration.
- C. Create a custom WDK component and configure a TaskSpace generic tab to display the WDK component.
- D. Extend the TaskSpace folder tab container, then add a custom WDK component in the container to show the custom folder information.

Correct Answer: A

---

#### QUESTION 5

In an xCP application, every queue processor is given one of two skills. A document review process has a package that has an attribute required\_skill that is always set to one of those skills.

What is the EMC best practice to ensure queue processors only receive tasks that match their skill?

- A. Create an ACL for each skill and add the appropriate users to each, then use a Process Data Mapper activity to map required\_skill to the acl\_name of the workitem.
- B. Create the skills on the queue's work queue policy, and then use an activity template to map required\_skill to the queue assigned as the next activity's performer.
- C. Assign the queue as the performer of the manual activity, then use the data mapper tool to associate required\_skill to the skill on the activity.
- D. Assign the queue as the performer of the manual activity and create an alias set for each skill, then store required\_skill as the workflow alias and use the data mapper tool to assign the skill to the activity.

Correct Answer: C
