#### QUESTION 1

A TaskSpace application uses a custom folder type to store information about a case and must display case information as users navigate subfolders.

What is the EMC recommended approach for satisfying this requirement?

- A. Create a folder information template for the custom folder type and use it in a TaskSpace folder tab.
- B. Add a folder content view control in an electronic form template and map the folder type to it in the TaskSpace configuration.
- C. Create a custom WDK component and configure a TaskSpace generic tab to display the WDK component.
- D. Extend the TaskSpace folder tab container, then add a custom WDK component in the container to show the custom folder information.

Correct Answer: A

---

#### QUESTION 2
